

# Annual Report 2024

## **Management Philosophy**

Taking a thorough customer-oriented approach,
striving to solve diverse challenges,
and exploring the future of Hokkaido

This North Pacific Bank Annual Report 2024 (Disclosure Book, Main Volume) exists to provide shareholders, investors, and other stakeholders with a better understanding of the North Pacific Bank Group's efforts to create sustainable value. The report also serves as the Main Volume of the Disclosure Book (documents explaining the status of operations and assets) in accordance with Article 21 of the Banking Act. When reading this report as a disclosure book, please read it alongside the North Pacific Bank Disclosure Book, Financial Statements Volume (March 2024), which can be downloaded on our website (https://www.hokuyobank.co.jp/ir/library/disclosure.html).

# All for Hokkaido

In March 2020, in light of the declining population and other aspects of increasingly challenging circumstances, the North Pacific Bank Group formulated a new Management Philosophy to clearly state the role that each and every employee should play toward achieving their mission to contribute to the future of Hokkaido.

North Pacific Bank Group Management Philosophy

Taking a thorough customeroriented approach, striving to solve diverse challenges, and exploring the future of Hokkaido

Long-term Vision

Striking a full balance between investment in contribution to the environment and society on one hand, and investment in economic growth on the other, we will help realize future-oriented, prosperous local communities

Support for sustainable management for companies in Hokkaido and for individuals in designing sustainable living

**Code of Conduct** 

and our social responsibilities

Acting with integrity and a firm awareness of compliance

**Maximizing teamwork** through mutual respect for each other

Thinking on our own to take on new challenges without fear of change

**Pursuing the** gratitude of

our customers

## Ambitiously working to develop new industries to contribute to the sustainable future of Hokkaido

## On assuming the office of President

I was born in Hokkaido, but lived in Honshu for a long time because my father was transferred for work. During that time, I had many opportunities to look at Hokkaido from the outside. It reminded me of all that is wonderful and appealing about Hokkaido, and filled me with the desire to contribute to my home prefecture and deepseated hope for the advancement of the region. I believe the environment I grew up in nurtured my curiosity and

helped me to create new ideas as a banker.

In April 2024, I assumed the position of President of North Pacific Bank, and am working to realize the vision and goals of the North Pacific Bank Group with the conviction that we can change and advance Hokkaido. Although the Group will face a variety of challenges amid constantly changing circumstances, we will continue to pursue ideas that lead to solutions, maintain a strong desire and spirit to achieve our goals, and continue to tackle the challenge of creating change and transformation.

## **Progress of the Medium-term Business Plan**

We are engaging in regular efforts under the Mediumterm Business Plan, which started in April 2023 and outlines three pillars-helping Hokkaido and our customers improve sustainability, development of human resources who support customer growth, and branch function restructuring and administrative streamlining to boost productivity—under the theme of "Taking on the Challenge of New Growth."

The circumstances surrounding our business remain clouded with uncertainty, with high commodity prices and labor shortages as well as the economic impact of

the end of the Bank of Japan's negative interest rate policy and the emergence of geopolitical risks around the world. Despite these circumstances, nonconsolidated results for the year ended March 31, 2024 showed an increase in core business profit and profit for the first time in two years due in part to an increase in interest on loans and discounts and the absence of one-time expenses, and these core results drove increases in both profit and income in terms of consolidated results.

It was also the first year of the Medium-term Business Plan, and while we achieved our profit target, we also saw issues that need to be improved.

One such issue was our inability to meet our target for our

ssage from

Hironobu Tsuyama

President, CEO, and CHRO

main business: loans to small and medium-sized enterprises in Hokkaido. This was due to higher-than-expected prepayments of loans given as COVID-19 pandemic support, but I also feel that we did not provide enough solutions to help customers resolve issues and develop and expand their businesses, which would have increased the amount of loans provided.

Another issue was insufficient efforts to support wealth-building. In this new era of 100-year life spans, there is a growing need for asset management through the new NISA investment scheme and other means, loans, assistance with asset succession, and other assets corresponding to different life stages, so we must provide our clients with useful information and satisfy their needs even more reliably.

## A time for change

New industries are sprouting in Hokkaido, the Group's operating base. Specifically, next-generation semiconductor manufacturers are building new facilities, and there are plans for green transformation (GX) and a cluster of space-related industries, all of which are having a significant impact on the prefecture's economy. With the redevelopment of the area outside Sapporo Station, the planned extension of the Hokkaido Shinkansen line, and the recovery of the tourism industry—Hokkaido's core industry—from the effects of the pandemic, it appears to me that Hokkaido is entering an era of great change.

The new facilities being built by next-generation semiconductor manufacturers represent a great opportunity for the Hokkaido economy. Construction is currently underway with the aim of launching prototype lines in April 2025. This construction is also creating demand for peripheral infrastructure and housing development. Amid this progress, we have already supplied loans for the next-generation semiconductor manufacturing facilities totaling more than 60.0 billion yen, and the customers' requests for information provision are increasing daily.

The development of the manufacturing industry centered on Hokkaido Valley, a nickname for the area from Ishikari Bay to Sapporo, Kitahiroshima, Eniwa, Chitose, and Tomakomai, and the promotion of expansion into Hokkaido by manufacturers of

semiconductor-related manufacturing equipment and materials are expected to have economic effects that will spread throughout the prefecture.

The role of the North Pacific Bank Group is to spread the business opportunities sprouting from next-generation semiconductor-related industries throughout Hokkaido to maximize their benefits. To help the region develop freely and sustainably, we will work with relevant organizations to provide business matching services and other information to people outside central Hokkaido, create relations between communities and companies, and provide companies from Honshu that wish to expand into Hokkaido with information on local subsidy programs, securing human resources in specialized fields, and the like to generate interest in many places across Hokkaido as options.

I also see great potential in GX-related industries. Hokkaido is a treasure trove of natural energy—mainly wind, but also solar, biomass, geothermal, and more. In fact, five areas in Hokkaido have been designated as promising areas under the Japanese government's offshore wind power generation policy, and two as upcoming areas for floating offshore wind power, meaning that Hokkaido will account for a third of Japan's offshore wind project formulation target.

These projects are steadily moving into the implementation phase. For example, commercial operation of a fixed offshore wind farm constructed in Ishikari Bay began in January 2024. Additionally, 40% of the total cost of the entire wind power development

project is devoted to maintenance costs, so ongoing demand for maintenance during operation should promote local employment opportunities. Other GX-related business opportunities that leverage Hokkaido's geographical advantages are expected to emerge in the future, such as construction of energy-efficient data centers that capitalize on Hokkaido's cool climate and renewable energy.

To take full advantage of these organically and intricately intertwined business opportunities in the semiconductor, GX-related, and other industries, North Pacific Bank will work with various organizations to develop new industries across Hokkaido.

## Responding in an era of change

Swift decision-making is needed to cope with the rapidly changing business environment which includes factors such as next-generation semiconductors, GX, and the end of the Bank of Japan's negative interest rate policy. However, audit and supervisory functions are also important. Effective June 26, 2024, we shifted from a company with an Audit & Supervisory Board to a company with an Audit and Supervisory Committee to create an organizational structure that can both

expedite decision-making and strengthen audit and supervisory functions.

Promoting delegation of important business execution decisions from the Board of Directors to the directors, and further delegation from the directors to the executive officers will make our decision-making and business execution more responsive. The Audit and Supervisory Committee will further improve the effectiveness of our audit and supervisory functions by conducting audits and supervision through the internal control system in collaboration with the Internal Audit and Inspection Department under its direction.

## Toward a corporate culture of pioneering

In the banking industry of the past, taking a conservative stance may have been the path to being profitable and secure. However, circumstances have changed. Customers' needs are more diverse, and banks are changing their business models to meet those needs.

Although safety is important when running a bank, going forward, we need to explore the frontiers while ensuring safety. Consistent with our Management Philosophy (Taking a thorough customer-oriented approach, striving to solve diverse challenges, and exploring the future of Hokkaido), we hope to create a corporate culture in which taking on challenges is valued and pioneering is the norm so that we can identify and provide solutions to our customers'

diverse challenges.

Given the long history of our bank, it will not be easy to change our corporate culture, but unless we change our organization and update our awareness, we will not be able to respond to the changes and transformations in this new world. Since assuming the office of President, I have taken every opportunity to encourage everyone to change and take on challenges. Though it may involve failure along the way, I hope to transform our organizational culture into one that encourages people to take on challenges with proper risk management.

We have already launched several of these initiatives. One involves revising our personnel system. When we asked people within the bank to apply to be project members, we received more than four times as many applications as we were able to accept, with everyone from young employees to branch managers stepping

forward. Employees who are willing to make changes are holding active discussions on the topic of creating environments where employees can exhibit their skills to the fullest.

Another initiative involves intra-bank contests for business ideas. The purpose of these contests is for employees to gain experience in formulating and proposing new ideas and discover and create new business ideas. They are designed to encourage employees to think freely and try out new things. We consider how to proceed depending on the details, for example, investing in an idea and having the person who proposed it serve as the president of an enterprise devoted to commercializing it.

We will continue to proactively provide opportunities for employees to take steps to pioneer and increase the number of employees who are willing to take it upon themselves to make moves and changes.

# Improving convenience and productivity through DX promotion

Along with developing human resources, we are working to promote digitization and other aspects of DX to improve our productivity without compromising customer convenience.

For example, we released the North Pacific Bank personal portal app last September. In its first six months of operation, the app gained more than 110,000 registered users, and remittances routed through it reached 10% of all channels. In July, we introduced the TSUBASA Smile system, in collaboration with the TSUBASA Alliance\*, with the aim of streamlining over-the-counter services. The time saved by reducing reception time for some services up to 60% has allowed us to increase dialogue with and make more proposals to customers.

We also provide training to develop experts in data utilization. We will continue our efforts to promote DX

9

throughout the Bank, first by leveraging our knowledge in marketing to retail customers.

\* The TSUBASA Alliance is a framework for broad cooperation among regional banks without mergers, in which North Pacific Bank and nine other banks participate

## Initiatives to enhance corporate value

Although our safety record is relatively high, we recognize that there are profitability issues in terms of ROE and other indicators. By correctly interpreting changes in external circumstances to improve our profitability while revitalizing the economy of Hokkaido, we will naturally gain recognition from the stock market, creating a virtuous cycle that will help us meet the expectations of our various stakeholders. We are working to enhance shareholder returns as well as to create opportunities for dialogue with investors in order to proactively disseminate information. This year, we are increasing the number of small meetings to promote more targeted dialogue and add to our usual large meetings for institutional

investors and analysts.

We will also increase opportunities to disseminate information to individual investors through online information sessions and other IR activities so that they can better understand North Pacific Bank. We have also introduced a shareholder benefits program to increase the appeal of investing in our shares and pique interest in our initiatives. In addition to expressing our gratitude to shareholders for their ongoing support, I hope that offering specialty products from Hokkaido as shareholder benefits provides opportunities for shareholders outside Hokkaido to experience the best the prefecture has to offer, while also serving to promote our customers' products and contribute in some small way to regional development.

## In closing

The North Pacific Bank Group will continue to refine its human resources, earn the trust of customers, local communities, and shareholders, and contribute to the sustainable future of Hokkaido.

We appreciate your continued understanding and support.

# Message from the CFO

Through appropriate financial and capital management, we seek to maximize the value we provide to our customers, communities, shareholders, and other stakeholders.

#### Kazushi Yoneta Managing Director, CSO, CFO, and CIO

#### **Overview of Results for FY2023**

On a non-consolidated basis, interest on loans and discounts increased due in part to an increase in loans to individuals, and interest and dividends on securities also increased thanks to an increase in yen-denominated bonds, resulting in core business profit of 20.1 billion yen, the first increase in two fiscal years. However, ordinary profit declined slightly due to higher credit cost, but net income increased for the first time in two fiscal years to 12.8 billion yen, mainly due to the absence of one-time expenses associated with the system migration in the previous fiscal year. Notably, each earnings category exceeded the earnings forecast. These core non-consolidated results drove increases in both profit and income in terms of consolidated results as well.

Non-consolidated (Unit: billion yen)	FYE Mar. 2024 actual	YoY	vs forecast
Core gross business profit	82.6	(0.0)	+1.7

#### Forecast for FY2024

In FY2024, we expect an increase in loan volume, including investments and loans in areas of expected growth in Hokkaido, an improvement in loan yields and gains on securities investments due to changes in the Bank of Japan's monetary policy, an increase in interest on deposits in the Bank of Japan's current account, and a decrease in credit cost.

Based on these projections, we forecast non-consolidated profit of 15.4 billion yen and consolidated profit attributable to owners of parent of 15.5 billion yen in FY2024.

	on-consolidated Init: billion yen)	FYE Mar. 2024 actual	FYE Mar. 2025 projected	YoY

North Pacific Bank Value Creation Story

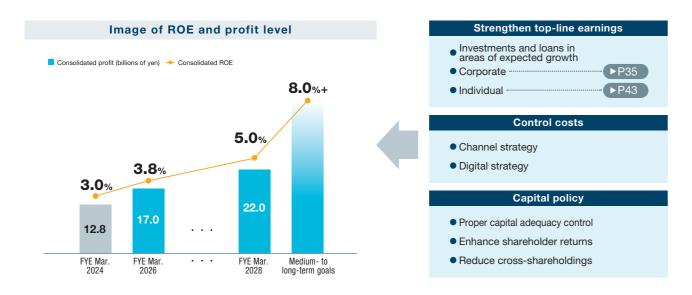

## Message from the CFO

#### Improving ROE

ROE was roughly 3% in the most recent financial results, and we recognize that improving profitability is an issue.

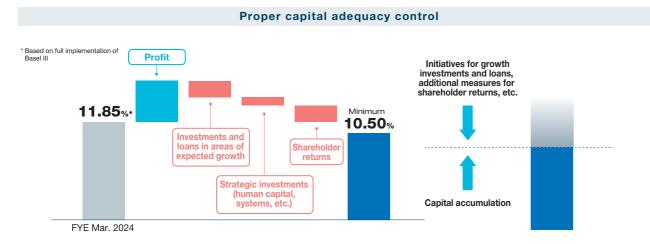

The three main pillars of ROE improvement are strengthening top-line earnings, controlling costs, and capital policy.

We will faithfully execute these measures with the aim of achieving the target ROE of 5% in the current Medium-term Business Plan in FY2027, one year ahead of schedule. Beyond that, we will chart a course to achieve ROE of 8%.

#### **Capital Policy**

To improve ROE, we will effectively use capital for investments and loans in areas of expected growth, strategic investments in human resources and systems, and shareholder returns, while maintaining sufficient financial soundness.

#### Proper capital adequacy control

- (1) Investments and loans (loans, securities investments, etc.) that contribute to improving ROE
- (2) Strategic investments to improve services and competitiveness (investment in human capital, systems, etc.)
- (3) Enhancement of shareholder returns (raise total return ratio from 40% to 50% starting in FY2024)

#### Maintain financial soundness

We will use stress tests and the ALM Committee to verify the proper level (lower limit) of capital adequacy ratio each year based on the Bank's projected earnings, the status of assets and liabilities, trends in external circumstances, and other factors.

#### **Enhancing Shareholder Returns**

Given the public nature of the banking industry and in pursuit of ensuring sound management, our basic policy is to provide comprehensive returns to shareholders while tracking trends in capital adequacy ratios and earnings, and changes in the business environment.

Regarding dividends for FY2024 (the fiscal year ending March 31, 2025) and beyond, we will maintain stable dividends and consolidate dividend measures into a single dividend payout ratio to create a straightforward structure for shareholders. We have set a target total return ratio of 50% and will take steps to further enhance the return of profits to shareholders through flexible, responsive repurchasing of treasury shares.

\* Total return ratio = (Total annual dividend amount + Total treasury share repurchasing amount) / Profit attributable to owners of parent

#### **Reducing Cross-Shareholdings**

Our policy is to avoid cross-shareholdings except in cases where it is deemed that the rationale of holding them is to contribute to the revitalization and promotion of the Hokkaido economy and the local community, to support local companies and help them develop, or similar aims.

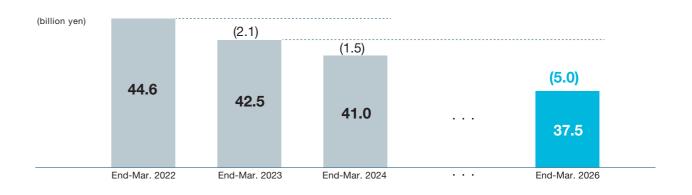

In pursuit of reducing cross-shareholdings, in November 2023, we announced our target to reduce the book value of cross-shareholdings by 5.0 billion yen from the figure in March 2023 by March 31, 2026.

We will continue to comprehensively assess the purpose of holding each individual stock, and will sell them whenever they are deemed to be unfit to continue to hold.

We will consider using the proceeds from such sales efficiently, for example strengthening earning power, investing and financing in areas of expected growth, and returning profits to shareholders.

#### Cross-shareholdings: Reduction target and book value

Reduction target: 5.0 billion yen from the book value on March 31, 2023 by March 31, 2026

North Pacific Bank Value Creation Story Strengthening Management Infrastructure for **North Pacific Bank Value Creation Story** Sustainable Corporate Value Enhancement

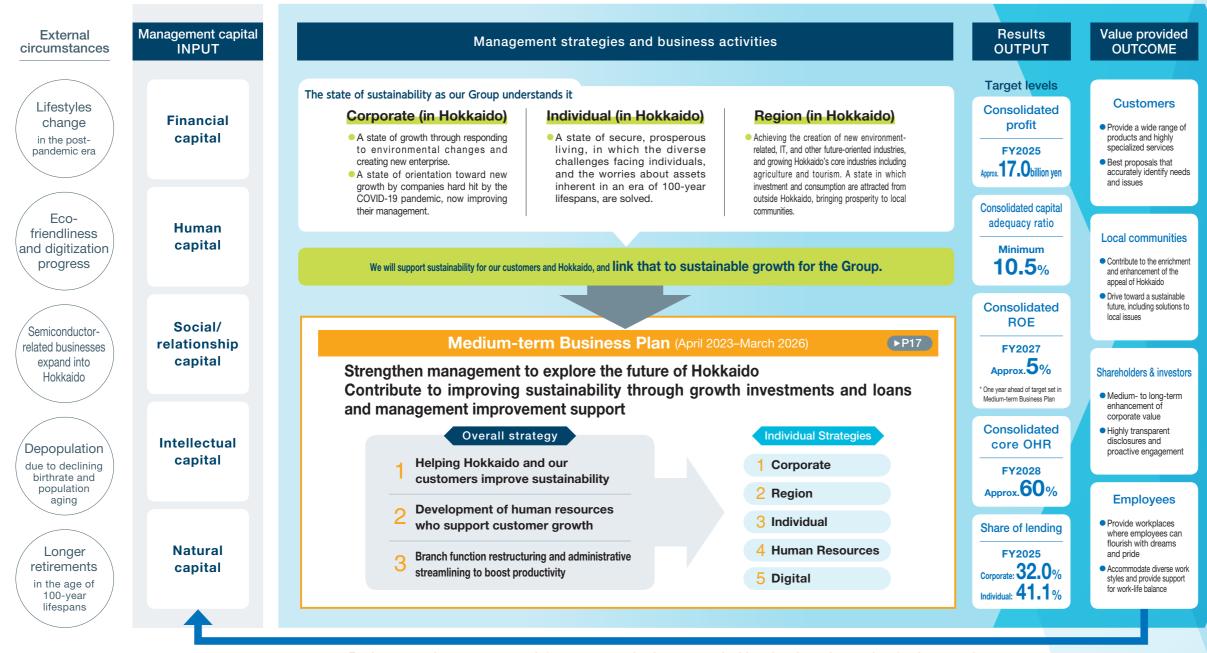

## **Value Creation Process**

Issues surrounding customers and communities are becoming increasingly diverse and sophisticated.

With a customer-oriented approach at the core of our Management Philosophy, the North Pacific Bank Group is leveraging its strengths (management capital) and pooling the efforts of its members to implement various measures (business activities) to achieve the goals of its Medium-term Business Plan. In addition to enhancing our corporate value, we will strive to maximize the value we provide to our customers, local communities, and shareholders by contributing to the realization of future-oriented, prosperous communities as stated in our Long-term Vision (providing value to stakeholders).

**Management Philosophy** 

## Taking a thorough customer-oriented approach, striving to solve diverse challenges, and exploring the future of Hokkaido

Further strengthen management infrastructure and enhance sustainable value through a cycle of value creation

In December 2018, the North Pacific Bank Group published the North Pacific SDGs Declaration, which signifies our commitment to supporting sustainable regional growth

sustainable world, adopted at United Nations Sustainable Development Summit 2015.

Long-term **Vision** 

Striking a full balance between investment in contribution to the environment and society on one hand, and investment in economic growth on the other, we will help realize futureoriented, prosperous local communities

Support for sustainable management for companies in Hokkaido and for individuals in designing sustainable living

and resolving social issues. SDGs: Global targets (17 goals, 169 targets) to be achieved by 2030 to realize a

16

# North Pacific Bank Group Medium-term Business Plan

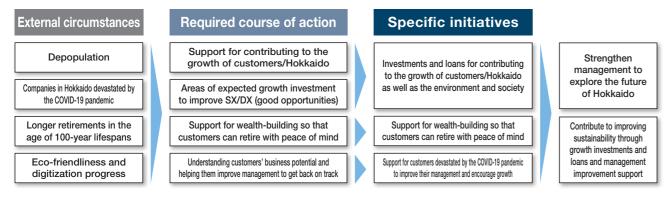

(April 2023-March 2026)

## Medium-term Business Plan: "Taking on the Challenge of New Growth: Growing sustainably together with our customers and local communities"

In April 2023, the North Pacific Bank Group formulated its Medium-term Business Plan, titled "Taking on the Challenge of New Growth: Growing sustainably together with our customers and local communities." We understand our mission to be that of supporting our corporate and individual customers in Hokkaido—a market at risk of contraction due to depopulation—and their local communities, in achieving sustainability. In our Medium-term Business Plan, we adopt the key terms of "growth" and "environment and society," under which we will strike a full balance between investment in contribution to the environment and society on one hand, and investment in economic growth on the other. In this way, we will contribute to sustainable growth for Hokkaido together with our customers and local communities.

#### **Course of Action Required by External Circumstances**

We believe the role required of the Bank is to strengthen management to explore the future of Hokkaido and contribute to improving sustainability through growth investments and loans and management improvement support, and will support the sustainable growth of Hokkaido with "growth" and "environment and society" as key terms.

#### **Long-term Vision**

With our stated Long-term Vision of "Striking a full balance between investment in contribution to the environment and society on one hand, and investment in economic growth on the other, we will help realize future-oriented, prosperous local communities," support sustainability for our customers and Hokkaido, and link that to sustainable growth for the Group.

#### Management Philosophy

Taking a thorough customer-oriented approach, striving to solve diverse challenges and exploring the future of Hokkaido

North Pacific Bank Group

#### **Future Direction of Management**

- Strengthen management to explore the future of Hokkaido. Support growth toward the future of Hokkaido, and contribute to realizing sustainable local communities.
- Helping discover new growth for customers that are deadlocked in their sustainable growth efforts.
- Contribute to each stakeholder, including our customers, local communities, shareholders and employees, and establish sustainable regional financial institution management.

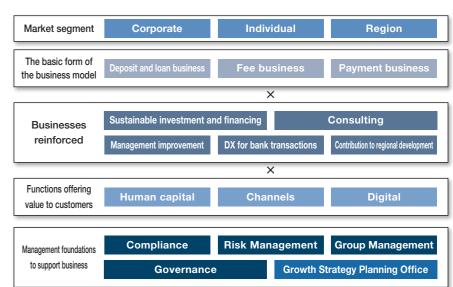

#### Striking a full balance between investment in contribution to the environment and society on one hand, and **Long-term Vision** investment in economic growth on the other, we will help realize future-oriented, prosperous local communities Support for sustainable management for companies in Hokkaido and for individuals in designing sustainable living The state of sustainability as our Group understands it A state of growth through responding to environmental changes and creating new enterprise. Corporate (in Hokkaido) A state of orientation toward new growth by companies hard hit by the COVID-19 pandemic, now improving their management. A state of secure, prosperous living, in which the diverse challenges facing individuals, Individual (in Hokkaido) and the worries about assets inherent in an era of 100-year lifespans, are solved. Achieving the creation of new environment-related, IT, and other future-oriented industries, and growing Hokkaido's core industries including agriculture Region (in Hokkaido) and tourism. A state in which investment and consumption are attracted from outside Hokkaido, bringing prosperity to local communities

The state of sustainability of the We will support sustainability for our customers and Hokkaido, and link that to sustainable growth for the Group.

#### Framework for a Business Model to Realize Our Long-term Vision

In our Medium-Term Business Plan, we express our contributions to our stakeholders in these terms: (1) growing together with our customers through a customer-oriented approach to business operations, (2) exploring the future of Hokkaido to contribute to local communities and grow together with the region, (3) returning our bank's profits to our shareholders so that we and our shareholders grow together, and (4) growing together with our employees through comprehensive human capital management.

#### **Overview of the Medium-term Business Plan (Overall Strategies)**

We have three overall strategies to realize our Medium-term Business Plan. We are working to resolve a wide variety of corporate, individual, and regional issues and achieve sustainable growth for our customers, Hokkaido, and the Group.

Vision of the Medium-term Business Plan (FY2023-FY2025)

"Taking on the Challenge of New Growth: Growing sustainably together with our customers and local communities"

# strategies to bridge the

#### (1) Helping Hokkaido and our customers improve sustainability

- → Support for corporate, individual, and local community sustainability and growth, with banking, HKP\*, and North Pacific Securities Co., Ltd. at the core
- → Support for growth and management improvement for companies in Hokkaido harmed by the COVID-19 pandemic \*Hokkaido Kyoso Partners Co., Ltd.

#### (2) Development of human resources who support customer growth

→ Human resource development at sales offices with a growth-support perspective, enhancement and development of specialized human resources with sophisticated problem-solving capabilities at HKP/North Pacific Securities Co., Ltd., and mid-career recruitment of specialized human resources who share our Management Philosophy and Code of Conduct

#### (3) Branch function restructuring and administrative streamlining to boost productivity

→ Improvement of customer convenience and our Bank's productivity through pursuit of the TSUBASA system's collaborative effects, application of IT to customer contact operations, and energizing DX investment

**Current status** 

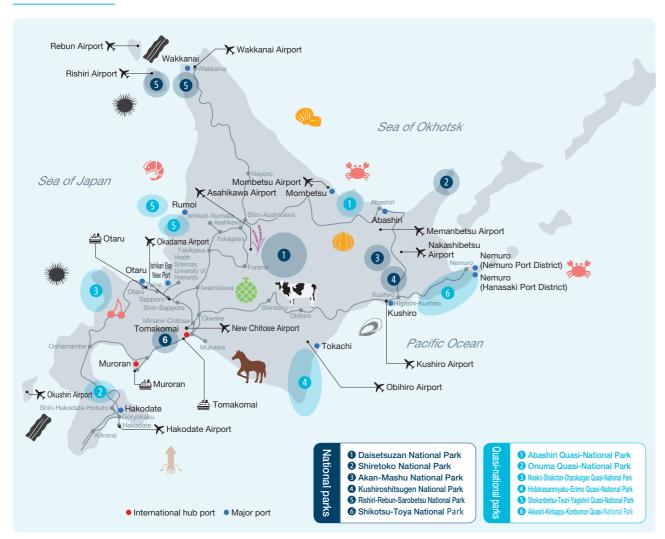

Concerns about sustainability due to stagnation of the Hokkaido economy

Further diversification and sophistication of issues surrounding customers

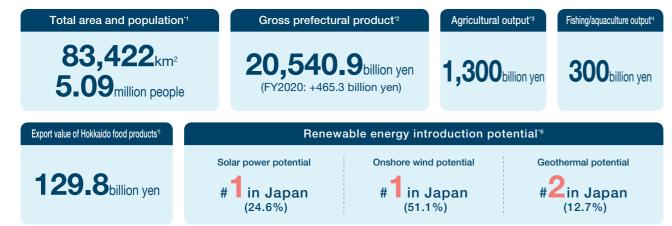

ligh cost structure based on branches and over-the-counter services

#### The Value of Hokkaido

#### The Hokkaido Brand of Food

#### Farming

Hokkaido farmers engage in large-scale, highly productive agriculture and dairy farming by taking advantage of the vast land resources available to them: 1.143.000 ha of arable land (26% of the total in Japan) and an average of 30.8 ha per farming operation (14 times the average for the 46 other prefectures). As the country's largest food supplier, the region contributes immensely to the stable supply of food in Japan. Hokkaido's food self-sufficiency rate (on a calorie basis) is 216%, ranking first in

Japan. With agriculture that leverages the region's climatic conditions and other factors, Hokkaido is an indispensable part of Japan.

(Source: Hokkaido prefectural government: "Hokkaido Agriculture and Rural Areas, 2022")

#### Fishing

Hokkaido is blessed with abundant water resources and accounts for roughly 20% of fishery production in Japan. Although depopulation and the lack of successors are causing the number of fishery workers and registered vessels to decline, the prefecture's fishing industry is still thriving, and still claims the highest number of fishery workers in Japan. Hokkaido's self-sufficiency rate in seafood is 359%, more than triple intraregional demand. Thus, Hokkaido's fishing industry is a major contributor to Japan's

seafood supply base. It also plays an important role in the world, with annual exports of more than 50.0 billion ven to China and other countries.

(Source: Website of the Fisheries Division, Hokkaido Regional Development Bureau, Ministry of Land, Infrastructure, Transport and Tourism)

#### **Ample Tourism Resources**

#### **Nature and Climate**

Located in the northernmost part of Japan, Hokkaido has four distinct seasons with a wide variety of seasonal expressions, although the climate varies from region to region depending on topography, location, and other factors. With World Natural Heritage sites, national parks, quasi-national parks, and prefectural nature parks throughout the prefecture, iconic Hokkaido landscapes can be enjoyed in all four seasons. Additionally, with an outstanding natural environment as well as

a wide variety of flora and fauna distinct to northern Japan, we have ordinances, plans, and other programs aiming to realize a society in harmony with nature that is uniquely Hokkaido.

(Source: "Hokkaido Data Book 2021\_ Nature & Climate")

#### **History and Culture**

Hokkaido's history and culture are distinct from the rest of Japan. Culture is on display at tourism facilities and heritages throughout the prefecture, including the passing down of indigenous Ainu and "Great North" cultures dating back several millennia, the southern part of the island functioning as a gateway to the seas, and development under the new Meiji government around the turn of the last century. Currently, 74 tangible and intangible treasures\* have been registered to pass down to future

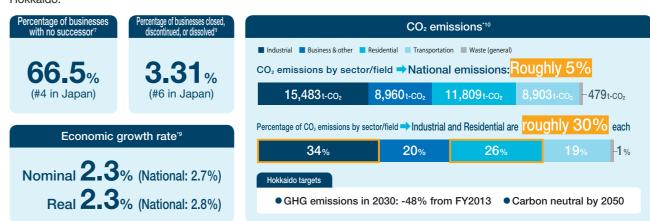

generations under the Hokkaido Heritage initiative, and it is expected that people throughout Hokkaido will work to preserve and utilize them.

(Source: Hokkaido Tourism Organization website, \*As of the selection on October 13, 2022)

#### **Local Issues in Hokkaido**

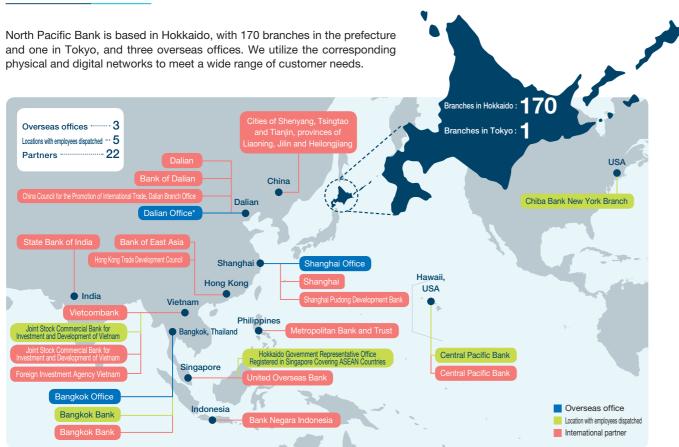

We support sustainable growth together with our customers and local communities, and make efforts to resolve local issues in Hokkaido.

# **Our Strengths**

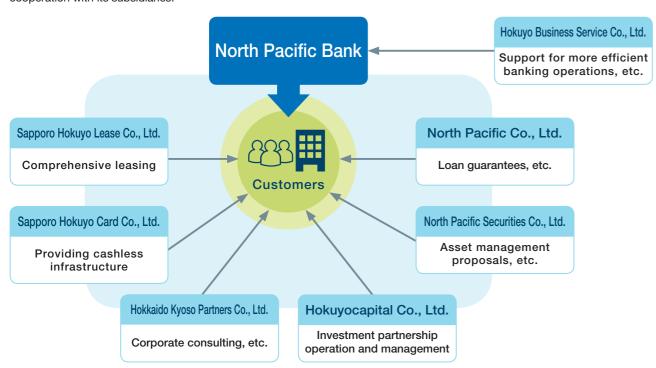

#### Strength 1 Network

\* As of October 1, 2024, the Dalian Office will be integrated into the Shanghai Office.

#### **Strength 2 Collective Strength of the Group**

We provide solutions to meet the diverse needs of our customers by leveraging the collective strength of the Group through cooperation with its subsidiaries.

#### Strength 3 Human Resources Who Support Local Sustainability

We believe that human resources are the key to our ability to grow together with our customers and communities, improve our earning power through such growth, and fulfill our mandate. To develop human resources who support the sustainability of local communities, we are strengthening our human resource development efforts to secure human resources in both qualitative and quantitative terms, and our highly specialized and skilled human resources are fulfilling active roles in meeting the diverse needs of our customers.

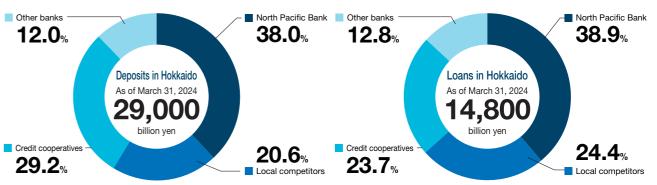

Number of employees with qualifications in FY2023 (as of March 31, 2024)

#### **Strength 4 Robust Customer Base**

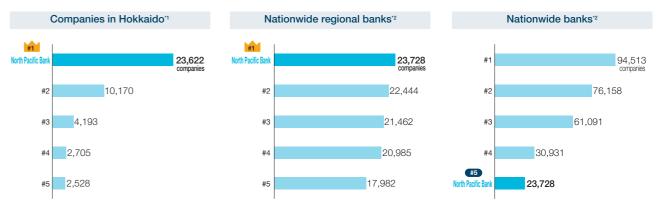

We have maintained the top share of deposits and loans among financial institutions in Hokkaido by leveraging our network of offices in the prefecture to become indispensable for our customers. We will maintain and strengthen our interaction with customers so that they continue to choose us as their main bank.

#### Share of deposits and loans in Hokkaido

- \* Shares based on the balance of domestic banks (excluding Japan Post Bank and the Resolution and Collection Corporation) and credit cooperatives with headquarters and branches
- \* Deposits include negotiable certificates of deposit (amounts of which among Hokkaido credit cooperatives were calculated using the balances among national credit cooperatives)

# Sustainability Policy and Promotion Structure

#### **Sustainability Policy**

Through corporate activities based on our Management Philosophy and Code of Conduct, the North Pacific Bank Group contributes to the sustainable development of all stakeholders, the regional community and environment which support us, while we also strive to achieve improved corporate value and sustainable business management for our banking Group over the

#### **Sustainability Management and Promotion System**

We have established a Sustainability Committee chaired by the President to strengthen our sustainability management efforts. The Sustainability Committee identifies sustainability issues and develops measures to address them based on the Sustainability Policy, establishes annual sustainability action policies, and reports and discusses measures and policies related to environmental conservation (e.g. climate change, biodiversity) and human capital (e.g. human resource development), the status of initiatives, and more. It reports on agenda items to the Board of Directors, and a system for appropriate monitoring and management has been established. Based on our Management Philosophy and Sustainability Policy, our Medium-term Business Plan (Taking on the Challenge of New Growth: Growing sustainably together with our customers and local communities) sets out our Long-term Vision (Striking a full balance between investment in contribution to the environment and society on one hand, and investment in economic growth on the other, we will help realize future-oriented, prosperous local communities). In addition to providing support for sustainable management for companies in Hokkaido and for individuals in designing sustainable living, we have identified three priority sustainability management issues (response to climate change, biodiversity conservation, and financial and economic education) and three priority issues for human capital (development of highly specialized human resources; pursuit of autonomy, diversity, and creativity; and improving employee engagement). We will link these efforts to the enhancement of the Group's corporate value and the realization of sustainable management.

#### **Policy System**

#### Promotion system

#### Themes of Priority Initiatives for Achieving the SDGs

Creating shared value with customers

We will create shared value for our customers and contribute to the sustainable growth of the Hokkaido economy through the smooth performance of our financial intermediary function by providing loans and funding based on our understanding of business potential, providing diverse solutions to meet the needs of our customers (e.g. regional revitalization, entrepreneurship, start-ups, sales channel expansion, business succession), and utilizing these solutions to support the food and tourism industriesregional strengths-and manufacturing, which is a challenge.

**Environmental** protection

We will help maintain and conserve Hokkaido's natural environment by reducing our own environmental impact through energy conservation and other bank-wide efforts, supporting environmentally conscious companies and environmental growth areas with various financial instruments, subsidizing individuals and organizations that work to

Based on circumstances in Hokkaido-an advanced region with a declining birthrate and aging population-we will contribute to enhancing medical welfare by providing management support to medical and welfare institutions, collaborating with medical universities in Hokkaido, supporting people with disabilities, and more.

We will promote financial and economic education with the aim of improving

financial literacy-which contributes to stable wealth-building through savings and

investments-in addition to advancing a broad range of high-quality education and

**Diversity** 

Through measures such as enhancing work-life balance, we will accommodate a variety of work styles that allow all employees-regardless of sex, age, nationality, and disability-to exhibit their skills to the fullest, and create an organization where

#### FY2023 Activities under Themes of Priority Initiatives for Achieving the SDGs

#### Medical Care and Welfare Initiatives

#### Joint seminar with Sapporo Medical University

We held this seminar in our seminar hall in October 2023 in an effort to promote the health of Hokkaido residents and contribute to local medical care. The event, which attracted 79 participants, was titled "Never Too Late to Prevent Blood Vessel Aging

#### Joint seminar with the Hokkaido prefectural government and Hokkaido Bank

We collaborated with the Hokkaido prefectural government and a regional bank to hold this event with the aims of stimulating further discussion of the regional medical care concept and providing support for functional differentiation and collaboration of medical facilities in the region. The presidents and administrative directors of major hospitals in Hokkaido shared current issues and future measures, and the Bank gave a lecture on financial assistance. Joint seminar with Sapporo Medical University: Lecture on Medical Care for Residents of Hokkaido

Joint seminar with Sapporo Medical University: Lecture on Medical Care for Residents of Hokkaido

#### **Education and Culture Initiatives**

#### Classical music concerts by the Sapporo Symphony Orchestra, presented by North Pacific Bank

Since 2012, we have held classical music concerts by the Sapporo Symphony Orchestra throughout Hokkaido. In addition to performances by the full orchestra, the group also holds mini-concerts by ensembles, allowing residents of Hokkaido to enjoy authentic classical music. A total of roughly 37,000 guests have been invited to date.

Scene of concert held in FY2023

#### Junior High School Student Writing Contest

Since FY2013, we have been a supporter of the Junior High School Student Writing Contest, on the belief that it is a meaningful initiative to allow students of that age-the future leaders of Hokkaido-to share their diverse everyday experiences and communicate their ideas. The theme in FY2023 was "My Favorite," and we received more than 11,000 entries describing the wonderful experiences and feelings inspired by the students' favorite manga, dramas, calligraphy, musical instruments, sports, and more.

#### **Diversity Initiatives**

#### Hokku Disabled Persons Sports Fund

We handle SDG (Parasports Support) Private Placement Bonds in an effort to support parasports. When a customer issues a private placement bond, the Bank contributes a sum equivalent to 0.2% of the total issued amount to the Hokku Disabled Persons Sports Fund for donation to athletes and organizations involved in parasports activities in Hokkaido. In FY2023, subsidies totaling 1.2 million ven were awarded to three recipients.

Additionally, as part of our comprehensive partnership agreement with the Hokkaido prefectural government, we conduct a sports support project that focuses on children and disabled children. Through this, we seek to improve children's physical strength and revitalize communities through sports for all children, and to deepen understanding of disabilities and help to promote social participation by children with disabilities.

#### Children's sports

With the cooperation of the Hokkaido Sport Association, we subsidize municipal sports associations that hold introductory sports classes for children. Under this initiative, we work with local youth sports teams and sports clubs of the recipient municipalities to provide at least 10 introductory classes for five different sports.

#### Adaptive sports for children

With the cooperation of the Hokkaido Association for Promotion of Sports for the Disabled, we provide subsidies to organizations active in adaptive sports for children with disabilities. We openly solicit applications and select organizations that engage in activities that help promote and improve adaptive sports for children with disabilities.

North Pacific Bank Value Creation Story

North Pacific Bank Value Creation Story

Strategies for Achieving Sustainable Growth

# **Climate Change Initiatives**

In May 2021, in response to growing societal awareness of the need to achieve sustainable local communities and environments, we formulated our Sustainability Policy and expressed our endorsement of the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD).

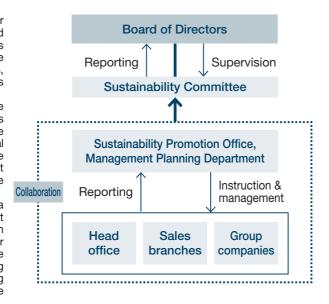

We will continue to develop our framework in line with the recommendations, contributing to all stakeholders who support our banking Group, as well as to the sustainable development of local communities and the environment, while striving to enhance the Group's corporate value and achieve sustainable management over the medium- to long-term.

#### Governance

The Group recognizes that addressing climate change and other environmental issues is one of the priority issues to be resolved ahead of others, and our Sustainability Committee discusses policies and progress on climate change-related initiatives. The committee reports the promotion status to the Board of Directors, and a system for appropriate monitoring and management has been established.

We also established our Environmental and Socially Considerate Investment and Loan Policy in December 2022 as part of our efforts to strengthen our sustainability-related governance. We have explicitly set out this initiative policy to define how we, as a financial institution, will actively engage in investments and loans that are environmentally and socially considerate, and that contribute most to resolving environmental and social issues in order to achieve regional sustainability.

The policy is separated into business that is believed to have a positive impact on the environment and society, and business that is believed to have a negative impact, and describes our stance on investments and loans, which is to proactively pursue the former and make prudent judgments on the latter. We will actively promote business and other activities that contribute to resolving environmental issues (e.g. environmental conservation, addressing climate change) because they have a positive impact on the environment and society.

#### **Strategy**

#### 1. Opportunities

We will contribute to the realization of a decarbonized society from both financial and non-financial perspectives by supplying financing (e.g. Sustainability-Linked Loans, Green Loans) and solutions (e.g. SDG Consulting, Decarbonization Consulting) to support our customers' transition to a decarbonized society.

#### 2. Risks

We recognize the transition risks and physical risks outlined below as those associated with climate change over the short-term (5 years), medium-term (10 years), and long-term (30 years) and continue to perform analyses utilizing the TCFD-recommended scenarios and advance quantitative evaluations of each risk.

	Assumed risks associon customer business	Timeline			
	Legal and regulatory	Carbon taxes and other tighter regulations on $\mbox{CO}_2$ emissions, etc.	Medium- to long-term		
Transition risks	Technology	Failure of investment in replacement of existing products with low-carbon technologies, etc.	Medium- to long-term		
	Market	Changes in consumer behavior, rising raw material costs, etc.	Medium- to long-term		
	Reputation	Condemnation of specific sectors, etc.	Short-term		
Physical risks	conditions threatening	uch as damage to the Bank's business assets due to extreme weather business continuity, or an increase in the Bank's credit-related expenses the performance of customers or damage to their business assets	Timeline		
i nysical risks	Acute	Increased flooding, etc., and worsening of extreme weather events	Short- to long-term		
	Chronic	Increase in average temperature, sea level rise	Long-term		

#### 3. Carbon-related Assets

Loans for the Energy and Utilities" sector represent 1.6% of the Bank's loans and bills discounted. Additionally, loans for carbon-related assets based on the 2021 TCFD Revised Annex represent 14.3% of the Bank's loans and bills discounted.

- \*1 Petroleum refining and petroleum product manufacturing, gas, coal products, major electric power companies, etc. Water and renewable energy generation utilities are excluded.
- excluded.
  \*2 The Transportation, Materials and Building Products, as well as the Agriculture, Food, and Forest Products sectors have been added to the Energy and Utilities sectors.

#### 4. Scenario Analyses

The TCFD Recommendations suggest conducting multiple scenario-based analyses to demonstrate the resilience of strategies to counter the risks of climate change. Our Bank conducts scenario analyses for transition risk and physical risks. We will continue to upgrade our analytical methods in order to link the results of scenario analysis to the Bank's risk reduction efforts and to enhance and support dialogue with our customers to help them transition to a decarbonized society.

	Transition risks	Physical risks
Risk Events	Impact on credit cost resulting from a worsening of customer's financial condition due to changes in the macroeconomic environment associated with the transition to a decarbonized society	<ul> <li>(1) Damage to collateral properties due to increased flooding, etc., and deterioration of the customer's business performance due to stagnation of business</li> <li>(2) Losses incurred by the Bank due to damage to the Bank's branches and other facilities as a result of increased flooding, etc.</li> </ul>
Subject of Analysis	Energy / Utilities / Iron and steel sectors	Business loan recipients in Hokkaido     The Bank's branches and other facilities (including ATMs)
Scenario	Net zero 2050, Delayed Transition (NGFS <sup>-3</sup> )	RCP2.6 (2°C scenario) and RCP8.5 (4°C scenario) in the IPCC' <sup>4</sup> Fifth Assessment Report
Results of Analysis	By 2050	By 2050
Results of Analysis	Credit cost increase: Cumulative amount of 11.3 to 17.2 billion yen	(1) Credit cost increase: Up to roughly 3.5 billion yen     (2) Increase in the Bank's losses: Up to roughly 0.6 billion yen

<sup>\*3</sup> Network for Greening the Financial System

#### **Risk Management**

We identify and centrally manage major risks—including credit risk, market risk, and operational risk—to ensure sound management and improve profitability.

We recognize and inform all within the Bank that changes associated with climate change may increase or decrease credit risk and other major risks through various contagion channels, and may significantly impact the Bank's business activities and financial position.

Through scenario analyses and calculations of our customers' GHG emissions, we assess the impact of climate change on our financial condition and our customers' business activities, and are building a system within our integrated risk management framework to reduce climate-related risks over the medium- to long-term by proactively supporting our customers' climate change initiatives, mainly by providing them with various solutions.

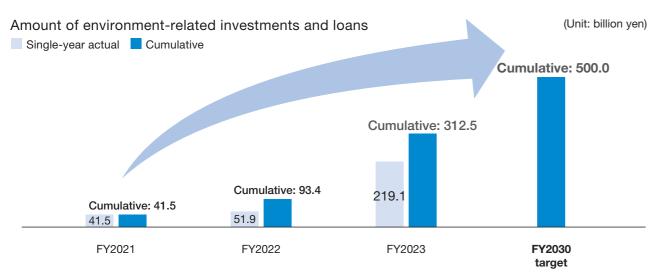

<sup>\*4</sup> Intergovernmental Panel on Climate Chan

#### Climate Change Initiatives

#### **Metrics and Targets**

#### Cumulative Amount of Environment-related Investments and Loans

To address climate change, in accordance with our belief that investment and financing are the areas of operations in which we can do the most to help solve environmental issues, we have set a target for the amount of environment-related investment and financing we should execute in support of the transition to a decarbonized society: 500.0 billion yen in the 10-year period from FY2021 to FY2030. Results since FY2021 are as follows:

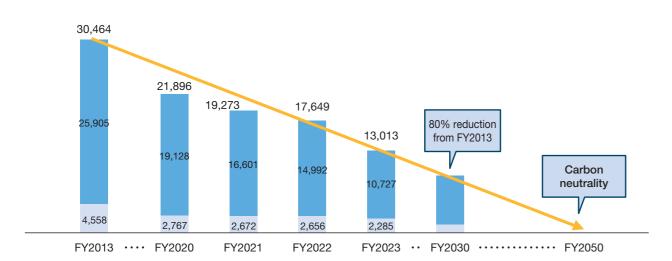

#### **GHG Emissions Reduction Initiatives**

We will proactively promote the decarbonization of the region.

(a) To reduce Scope 1 and 2 GHG emissions, the Group is upgrading to energy-saving equipment and introducing carbon-free electricity. In FY2023, we achieved a 57.3% reduction from FY2013, well on our way to 80% by FY2030 en route to our goal of achieving carbon neutrality by 2050.

Scope1 Scope2 (Unit: t-CO<sub>2</sub>)

(b) We are aware of the high expectations placed on financial institutions for initiatives for Scope 3 emissions. Category 15 (investments and loans) accounts for the majority of GHG emissions at financial institutions; therefore, we have begun calculating estimates for corporate borrowers while referencing the measurement method outlined in the PCAF1 Standard (the figures include 91% of loans to general business corporations).

(Unit: t-CO<sub>2</sub>)

	Scope 3 category	FY2020	FY2021	FY2022	FY2023
5	Waste generated in business activities <sup>2</sup>	_	_	_	24
6	Business travel	430	462	418	896
7	Employee commuting	1,563	1,494	1,425	1,432
15	Investments and loans	_	_	586,103	10,539,301

#### Breakdown of Scope 3, Category 15

Industry	Emissions*3 (Unit: t-CO <sub>2</sub> )	Carbon intensity <sup>*4</sup> (Unit: t-CO <sub>2</sub> /million yen)
Farming	126,494	6.61
Paper and Forestry Products	217,412	3.97

Total	10,539,301	_

\*1 Partnership for Carbon Accounting Financials, an international initiative for developing methods to measure and disclose GHG emissions in investment and financing portfolios

\*2 Disclosure of nine types of waste, including waste plastic. The scope will be expanded to include paper waste beginning in FY2024

\*3 The total amount of emissions multiplied by the Bank's loans as a percentage of the borrower's total amount of financing, rounded down to the nearest whole number

\*4 Emissions per million yen of sales by the borrower

# **Biodiversity Conservation Initiatives**

In December 2023, North Pacific Bank endorsed the Task Force on Nature-related Financial Disclosures (TNFD)\*1 and participated in the TNFD Forum in an effort to address climate change as well as to conserve and restore natural capital. In addition to climate change, the TNFD covers natural capital, which it defines as comprising land, sea, freshwater, and air. As a financial institution rooted in Hokkaido, we believe it is important to support the objectives of the TNFD and promote its efforts. Surrounded by three seas, Hokkaido is blessed with a rich natural environment, including vast forests comprising diverse tree species and one of the largest wetlands in Japan. Since 2010, the Bank has been working to conserve biodiversity and maintain the natural environment through the Hokku Fund, which supports organizations working to protect rare species of Hokkaido and improve their habitats. By participating in the TNFD Forum, we will contribute to the sustainable development of all stakeholders and local communities by applying knowledge of international trends and information gained from the forum and making efforts to disclose nature-related financial information and address climate change and protect the natural environment of Hokkaido.

\*1 An international initiative launched in June 2021 by the United Nations Environment Programme Finance Initiative (UNEP FI), the United Nations Development Programme (UNDP), Global Canopy (a British environmental NGO), and the World Wide Fund for Nature (WWF)

#### Status of the Bank's Initiatives

Although we have long engaged in nature conservation activities, we announced our intent to undertake conservation and restoration of natural capital starting in FY2023 and will continue to take actions in line with the TNFD framework to promote it throughout the Group.

FY2023	FY2024	FY2025 and beyond	
Declared intent to participate in the TNFD Forum (December 2023)     Sustainability Committee began specific discussions on how to proceed	Create heat maps based on the LEAP'2 approach to ascertain the degree of customers' dependency and impact on natural capital TNFD-recommended disclosure items: Governance, Strategy (Risks and Opportunities), Risk Management, and Metrics and Targets Selected for the Ministry of the Environment's FY2024 Pilot Program for Analyzing Nature-Related Information to Realize Decarbonization (for Financial Institutions)	Enhancement of Governance, Strategy (Risks and Opportunities), Risk Management, and Metrics and Targets disclosures     Specifically, analyze Strategy (Risks and Opportunities) based on the LEAP approach recommended by the TNFD	

<sup>\*2</sup> LEAP is an acronym for Locate, Evaluate, Assess, and Prepare. The approach was published to serve as practical guidance for incorporating nature considerations into the risk management processes of corporate value chains and portfolios of financial institutions and other organizations.

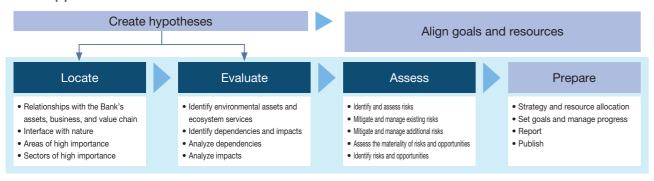

#### Working Toward Disclosures Based on the TNFD Recommendations

The TNFD Recommendations call for the disclosure of Governance, Strategy (Risks and Opportunities), Risk Management, and Metrics and Targets.

To identify natural capital-related risks and opportunities, we recognize the need to ascertain how the Bank's investments and financing are related to natural capital and vice versa.

In line with the LEAP approach recommended in the TNFD framework, we will analyze and ascertain the dependencies and impact of investee and borrower companies on natural capital in an effort to appropriately manage risks to natural capital and capture business opportunities.

#### **LEAP** approach

#### Using ENCORE<sup>13</sup> to identify sectors with high dependency and impact

In the course of analyzing the dependencies and impact of our investees and borrowers on natural capital, we used ENCORE to analyze and create heat maps of the dependencies and impact of TNFD priority sectors.

The analysis revealed high dependency on water in many sectors. We found high dependencies in particular on two such sectors: Construction Materials, and Paper and Forestry Products. In terms of impacts, we found that many sectors have a significant impact on water usage and terrestrial ecosystem usage, and zeroed in on Construction Materials, Containers and Packaging, and Metals and Mining accordingly.

We will use this analysis as the basis for continuing to identify and analyze priority sectors, taking into account balances of investments and loans and their importance within the region.

	TNFD priority	Direct Physical Input						Enal	oles Produ	ction Pro	cess			Pro	tection fro	m Disrupt	tion

<sup>\*3</sup> ENCORE is a tool developed jointly by the United Nations Environment Programme World Conservation Monitoring Centre (UNEP-WCMC) and financial institutions to assess relationships between production processes and ecosystem services.

#### **Biodiversity Conservation Initiatives**

## **Spotlight**

#### **Biodiversity Conservation Initiatives**

#### Hokku Fund

The Hokku Fund was established in 2010 with the aim of conserving Hokkaido's biodiversity, and provides a broad range of financial aid to organizations working to protect rare species and improve habitat environments in Hokkaido. Since its establishment, the fund has provided subsidies totaling 92.6 million yen to a total of 185 recipients. We have established the public/private collaborative Hokku Fund Selection Committee\* to conduct the selection of funding recipients, and to ensure the validity, fairness, and transparency of funding. The equivalent of printing cost savings resulting from digitization of passbooks through the North Pacific Bank app and Hokuyo Smart Passbook smartphone applications, as well as proceeds from the sale of the Hokku LINE Stamp, will be contributed to the Hokku Fund as its main source of funding.

\* Comprising the Hokkaido prefectural government, the Hokkaido Environment Foundation, the Japanese Association of Zoos and Aquariums, and North Pacific Bank

In FY2024, a total of 7.2 million yen was provided to 19 recipients, eight under the Hokku Course (maximum subsidy of 1 million yen) and 11 under the Tom Course (fixed subsidy of 100,000 yen).

#### Examples of activities by FY2024 Hokku Fund subsidy recipients

Lake Shikaribetsu Biodiversity Conservation Council • Signal crayfish control

Haboro Collective Natural Space Creation Council
• Tree-planting drives

Okhotsk Fish Conservation Society
• Installing fish ladders for salmon

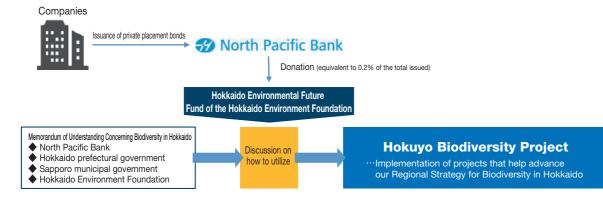

FY2024 Hokku Fund Presentation Ceremony

#### SDGs (Biodiversity) Private Placement Bonds

To conserve the wealth of biodiversity in Hokkaido and support initiatives for sustainability, we concluded a Memorandum of Understanding Concerning Biodiversity in Hokkaido with the Hokkaido prefectural government, the Sapporo municipal government, and the Hokkaido Environment Foundation, and began handling SDGs (Biodiversity) Private Placement Bonds in April 2023. Each fiscal year, we support the initiatives of Hokkaido and Sapporo by donating a portion of the amount issued to the Hokkaido Environment Foundation's Hokkaido Environmental Future Fund.

Under the Memorandum of Understanding, we have also established the Hokuyo Biodiversity Project and carry out projects that help advance our Regional Strategy for Biodiversity in Hokkaido. To raise awareness among residents of Hokkaido who enjoy the blessings from the prefecture's ecosystems, the Bank will strengthen its efforts for biodiversity together with local businesses.

#### Flow of biodiversity conservation initiatives

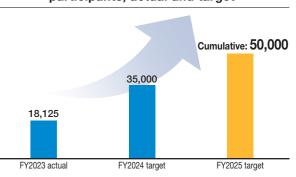

## Financial and Economic Education Initiatives

As a financial institution rooted in the community, we consider educational activities for children—the future of Hokkaido—to be an important initiative, and we therefore put effort into financial education and support for their development.

With the growing need to prepare for an age of 100-year lifespans, correct financial knowledge and awareness of wealth-building are more important than ever. Given developments such as the April 2022 lowering of the age of majority to 18, and moves to improve financial literacy such as the addition of wealth-building to high school curriculum guidelines, we have discerned that the role regional financial institutions play in financial education has increased. In response, we launched the Hokuyo Financial Classroom project in April 2022. This project includes lectures for university students in Hokkaido, seminars for high school teachers and PTAs, outreach lectures for elementary, junior high, and high school students, and more.

We will continue to conduct educational activities in collaboration with local communities and contribute to improving the financial literacy of residents of Hokkaido.

## Number of Hokuyo Financial Classroom participants, actual and target

#### **Hokuyo Financial Classroom**

## Lectures on finance and economics for Hokkaido University students

From October 2023 to January 2024, 15 lectures were held to impart general financial knowledge as well as to promote understanding of a wide range of fields, including the financial industry, regional revitalization, and sustainability with the aim of providing well-planned learning opportunities for Hokkaido University students to acquire the ability to make proper judgments and acquire correct knowledge about money.

\* Collaboration with SMBC Consumer Finance Co., Ltd. and leading companies of the SMBC Group

Lecture on financial knowledge by an employee of the Bank

## Creating educational materials: SDGs Challenge!

In October 2021, we started handling SDG (Education) Private Placement Bonds (Education Support Type) in which a portion of the issue amount is allocated to support education for children in Hokkaido. With the understanding and cooperation of companies issuing private placement bonds, we used an amount equivalent to 0.2% of the total issued to create SDG educational materials for FY2024 ("SDGs Challenge!") to provide elementary school students in Hokkaido with opportunities to learn about the SDGs.

These materials, which were supervised by Hokkaido University of Education, introduce 17 specific case studies involving Hokkaido, Japan, and the rest of the world with the aim of encouraging children to think and take action on their own. The children are expected to write down items of interest on a worksheet in the hope that it will inspire them to rise to the challenge of achieving the SDGs.

North Pacific Bank Value Creation Story

Strategies for Achieving Sustainable Growth

# Message from the CBPO

Sustainably improving our corporate value with a consistently customer-oriented approach

#### Hitoshi Masuda

Deputy President and CBPO (Representative Director)

#### Introduction

Around 15 years ago, when I worked in what was then the Risk Management Department, I spent the bulk of my time calculating probabilities for loan loss risk and estimating expected default rates, expected loss rates, and other factors used to predict average and maximum loss amounts.

Although I later served successive terms as the manager of major branches, my time calculating risk and working on the front lines of sales convinced me that having an eye for qualitative positives that cannot be quantified, for example a company's appeal and technology, could increase the range of risks that could be eliminated and expand the scope of proposals beyond what can be done with calculated risk alone. This is what it means to confront risks from all angles. Our business growth support and consulting services are important ways for us to learn and gain a discerning eye by getting to know our customers better through dialogue. They are lifelines for creating a virtuous cycle in the Hokkaido economy.

#### Becoming a Bank That Grows Together with Local Communities /

The Japanese economy faces an ever-changing environment, with high commodity prices, labor shortages, concern over the impact of the end of the Bank of Japan's negative interest rate policy and the prolonged depreciation of the yen, a declining birthrate and population aging, an increasing concentration of the population in urban areas, and the advancement of a digital society against a background of progress in GX and the rapid development of open AI.

In this complex, diverse social environment, we must rise to the challenge of confronting risks from all angles more than ever before so that we can become a company that explores the future of Hokkaido, as stated in the Group's Management Philosophy.

In my view, the Group's mission is not only to meet the apparent needs of our customers, but also to uncover their latent needs and resolve their issues, thereby contributing to the provision of value, growth, and development of our customers and local communities, and enhancing the sustainability of society as a whole, which in turn will enhance the corporate value of the Group. To succeed in this mission, we must improve the level of our relationships with our customers through dialogue and communication with them, and continue to boldly tackle challenges without fear of change and without being bound by precedent. Each and every one of our executives and employees must continue to think and act on their own initiative and thoroughly implement a customer-oriented approach with the aim of working together with local communities to sustainably enhance our corporate value.

#### **Making Our Long-term Vision a Reality**

To ensure that our Long-term Vision comes to pass, it is essential for our stakeholders to understand and resonate with our Management Philosophy and vision. Accordingly, it is important for every executive and employee to approach our customers with reverence, treat their concerns and needs as their own, and continue to work with them to resolve issues and meet their needs. The Medium-term Business Plan, launched in April 2023, sets out three overall strategies. We are devoting energy toward investment and financing for customers' growth, the environment, and society; wealth-building support for the era of 100-year

investment and financing for customers' growth, the environment, and society; wealth-building support for the era of 100-year lifespans; and support for management improvement for customers harmed by the COVID-19 pandemic. All of these efforts share the goal of achieving sustainable growth in Hokkaido and local communities. As we continue to change along with society's diverse needs and social issues, we will continue to develop our business models and value-providing functions for each market segment across the Group to customize our response to the diverse needs of our customers, and further deepen the structures and systems that enable us to accommodate them without losing our long-term perspective.

#### In-depth Dialogue with Customers for Deeper Understanding and More Targeted Support

Improving the stability, fulfillment, and satisfaction of the lives and livelihoods of all Hokkaido residents is critical for revitalizing the prefectural and regional economies, and that to achieve this, we must create a virtuous cycle in the Hokkaido economy. A virtuous economic cycle is one in which the growth and development of many businesses—including small and medium-sized enterprises (SMEs) in Hokkaido—leads to increased sales, revenue, and profits, which in turn revitalizes the economy and increases the income and spending of Hokkaido residents, leading to further growth and development of the Hokkaido economy. To support the creation of such a virtuous cycle, we are focusing on business growth support, mainly for SMEs in Hokkaido. We will confirm and reach a shared understanding of how our customers intend to develop their businesses in this everchanging environment, and work with them to improve their corporate value while providing comprehensive support for everything from cultivating to protecting their valuable assets.

In the past several years, Hokkaido's potential has been attracting attention both domestically and internationally, and outstanding business opportunities are being created one after another. These opportunities do not change our mission, which in my view is to support both local companies and those expanding into Hokkaido by providing investments and loans, encouraging corporate relocations to Hokkaido, business matching, and more to spread the benefits throughout Hokkaido in order to revitalize local companies. The overall aim is to improve the economic strength of Hokkaido residents and provide them with the support and assistance they need to build wealth.

The collective strength of the North Pacific Group is behind our ongoing efforts to provide consulting based on in-depth dialogue with customers for deeper understanding and more targeted support.

#### **Taking on the Challenge of New Growth**

We are now in the second year of our current Medium-term Business Plan, entitled Taking on the Challenge of New Growth. In discussions leading up to the development of this plan, we considered it our responsibility to develop sustainable local communities through the resolution of many social issues from a financial perspective. When we speak of developing local communities, we include corporations, individuals, and all of Hokkaido, with the key terms "growth" and "environment and society." In addition to the megatrends of depopulation and population aging that are progressing faster in Hokkaido than in Japan as a whole, the outflow of young people to the Tokyo metropolitan area is directly related to labor shortages. The impact of climate change on agricultural and fishery products has become particularly pronounced, and efforts must be made to maintain ecosystems. While confronting these environmental and social challenges and maintaining a customer-oriented approach, we will advance proposals to meet latent and diverse needs through dialogue with all customers, whether corporate or individual.

We will also ride recent tailwinds—including the designation of Sapporo as a GX Finance and Asset Management Special Zone and the expansion of the IT industry into Hokkaido—to promote the sustainable economic development of Hokkaido as a whole based on the Medium-term Business Plan.

# Corporate Strategy

Targeted response to customer needs by leveraging the corporate functions of the North Pacific Bank Group

### Toshiyuki Satonaka

Executive Officer and General Manager of Corporate Business Headquarters

#### **Providing Support for Sustainable Management**

With the aim of growing together with our corporate and business customers by supporting their sustainable management, we will proactively work to resolve labor shortages, lack of successors, and other management issues.

For both corporate and business customers, we intend to offer convenience and cut down on time previously spent visiting our branches by promoting digitization such as the electronic delivery function of interest and bank statements, electronic submission of documents, and more.

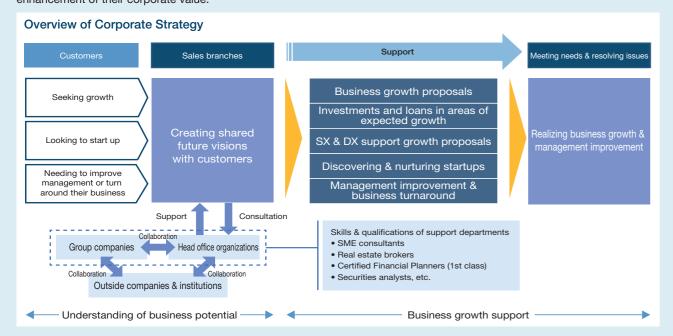

These moves to increase productivity within the Bank should provide more opportunities to interact with customers, ultimately leading to an increase in quality proposals.

In terms of specific support, our business growth support helps both corporate and business customers realize their visions for the future. Regarding investments and financing in growth areas, we will provide support not only for direct transactions related to semiconductors and GX, but also for securing employees and livelihoods for relevant companies. Additionally, to support the growth and development of local companies, we will offer startup assistance in the form of funding through a second Hokuyo SDG Promotion Fund No.2, start offering Hokuyo Startup Loans, and continue to hold business fairs for exporting food products from Hokkaido and also for matching companies, for example North Pacific Bank Manufacturing Sustainability Fair.

While meeting a wide range of corporate and business needs, we will leverage the corporate functions of the North Pacific Bank Group to resolve issues in a proactive effort to contribute to the sustainability of companies in Hokkaido.

#### **Customer Support through Consulting**

For customers who are looking to grow, start up, or improve their management, we will create shared future visions and provide support for business growth and management improvement through consulting, thereby contributing to the enhancement of their corporate value.

#### **Assistance for SMEs**

To support our customers' growth, we must create shared future visions and strategies. Therefore, based on information obtained through ongoing dialogue with our customers, our sales branches and head office share information and communicate with each other, consider what is necessary for our customers, and propose solutions accordingly.

#### **Business Growth Support**

- Given concerns over the contraction of the Hokkaido market as the population declines, we launched this initiative as part of efforts to promote customers' growth by responding to changes in their circumstances, creating new businesses, and the like.
- Specifically, we ask customers about their visions for the future, propose growth strategies and other measures to realize their visions, and work together to create roadmaps.
- We regularly monitor these roadmaps to support not only short-term, but also medium- and long-term initiatives for business growth.
- We provide support not only through the Bank, but also from multiple angles through business matching and collaboration with local and outside organizations and institutions.

## Examples of customer support options

Bank transactions	EC & website utilization
Leases and installment sales	Crowdfunding
Real estate	Sales channel expansion
Cashless transactions	Business fairs
Insurance	Overseas assistance
Asset management	Environmental issue-related support (e.g. decarbonization, food loss)
Surveys, research, & seminars	Human capital-related support     (e.g. health management, human resource development)
Consulting services	Governance-related support     (e.g. BCP, organizational reform)
Security	Asset utilization

#### Investment in Areas of Expected Growth / SX & DX Support

- The Group views semiconductor- and GX-related industries as areas of expected growth, and is developing initiatives in
- To enhance corporate value, we provide support to customers for SX (management and business transformation to achieve both sustainability (ESG) and earning power) as well as DX (corporate culture and business flow transformation through data and digital technology).

#### **Discovering & Nurturing Startups**

- As a driver of economic growth, the Japanese government is implementing a five-year plan to nurture startups; in Hokkaido, STARTUP HOKKAIDO, an initiative organized by the Hokkaido prefectural government, the Sapporo municipal government, and the Hokkaido Bureau of Economy, Trade and Industry, has been launched, and startups are gaining momentum.
- The Bank has specific options for all loans, investments, and subsidies for startups, with a focus on financial support.

#### **Examples of support**

Funding	Second Hokuyo SDG Promotion Fund No.2
Financing	Hokuyo Startup Loans
Subsidies	North Pacific Bank Startup R&D Fund
Human resources	Collaboration with Hokkaido Kyoso Partner Co., Ltd. (a subsidiary)
Sales channel expansion	North Pacific Bank Manufacturing Sustainability Fair

#### **Management Improvement & Business Turnaround**

- Our sales branches and the Business Improvement Support Group of the Loan Administration Department, a specialized division of the Bank's Head Office, are working together to strengthen predictive management.
- In addition to individually examining management improvement and business turnaround schemes aimed at resolving customers' management issues (e.g. business turnaround assistance based on guidelines for business turnaround and other support for SMEs), we also work with outside professional organizations to provide highly specialized support for management improvement and assistance for drastically turning around business to customers with increasingly diverse and complex management
- We are also working on human resource development to enable us to dig deeper, propose solutions, and resolve issues related to both apparent and latent needs.

General Manager of the Loan

Administration Department

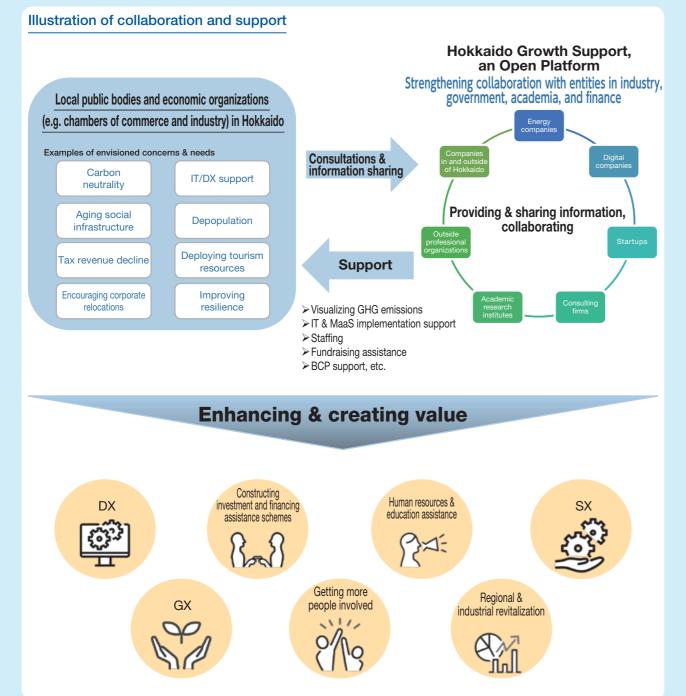

# ■ Regional Strategy

37

We will strengthen our initiatives for new and growth industries in cooperation with local communities to promote investment and stimulate spending in Hokkaido, thereby contributing to the realization of a sustainable society.

#### **Hokkaido Growth Support, an Open Platform**

In April 2023, North Pacific Bank established an open platform to facilitate concerted efforts by the head office and branches to ascertain needs and collaborate with entities in industry, the government, academia, and finance with the aim of supporting local public bodies and economic organizations in resolving issues and developing and realizing sustainable local communities. Since then, we have provided an ample array of solutions to address the needs and concerns of our clients. In addition to resolving issues faced by local public bodies, the Bank aims to expand business opportunities by ensuring that the benefits of this initiative reach local companies.

#### **Case Study 1: Promotion of Community-Wide Decarbonization in Eniwa**

In June 2023, North Pacific Bank, the Eniwa municipal government, and Zeroboard Inc., provider of a cloud service for calculating and visualizing GHG emissions, signed a basic agreement for realizing a decarbonized society in Eniwa and its environs. This was the first agreement between a financial institution in Hokkaido and a local government aiming to realize a decarbonized society. We will continue to promote support for decarbonization for Hokkaido residents.

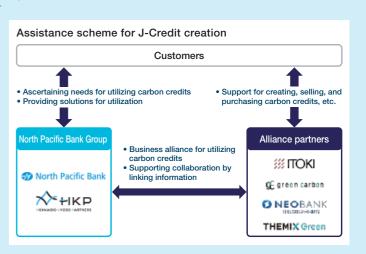

#### **Case Study 2: Support for J-Credit Creation**

In November 2023, the Group entered into a business alliance in Hokkaido with Itoki Corporation, Green Carbon,inc., SBI Sumishin Net Bank, Ltd., and Themix Green, Inc. through Hokkaido Kyoso Partners Co., Ltd. (a subsidiary) to promote decarbonized management and increase profits from carbon credits\* by supporting the creation of carbon credits for a wide range of customers. Amid mounting global concern over climate change, efforts to achieve carbon neutrality are gaining momentum, and companies in Hokkaido must also answer the call for decarbonization management.

As a group of regional financial institutions rooted in Hokkaido, we will continue to contribute to the enhancement of our customers' corporate value, the achievement of carbon neutrality for Hokkaido as a whole, and the revitalization of the local economy by supporting decarbonized management of companies in Hokkaido.

\* Carbon credits are a mechanism that allows companies to issue and trade (with other companies) credits for reductions in (or absorption of) CO<sub>2</sub> and other greenhouse gases achieved by introducing energy-saving and renewable energy equipment, forest protection, afforestation, and other efforts

#### Case Study 3: Participating in the Nord SeaEra Project in Hakodate

Against the backdrop of the Japanese government's decarbonization policy, which aims for net zero GHG emissions by 2050, and the growing need to utilize alternative fuels, the Bank has been involved since October 2023 in considerations for a renewable offshore power generation and hydrogen business model (the Nord SeaEra Project) in Hakodate initiated by MOL Techno-Trade, Ltd. In May 2024, we began the transition into the consideration phase for the demonstration and real-world implementation of Japan's first hydrogen production plant vessel and the establishment of a local hydrogen supply chain.\* We continue to provide support to encourage companies whose businesses are centered in Hakodate to participate.

The focus of this consideration is to examine the concept of local production of energy for local consumption, in which renewable energy is generated offshore in local seas, converted to hydrogen, and used in the private sector. However, given that the energy could also be used in construction for ports and harbors as well as onshore facilities, or as part of municipal BCP measures to respond when terrestrial energy supply networks are cut off from each other due to natural disasters or the like, we will continue to provide support as part of our assistance for municipal governments.

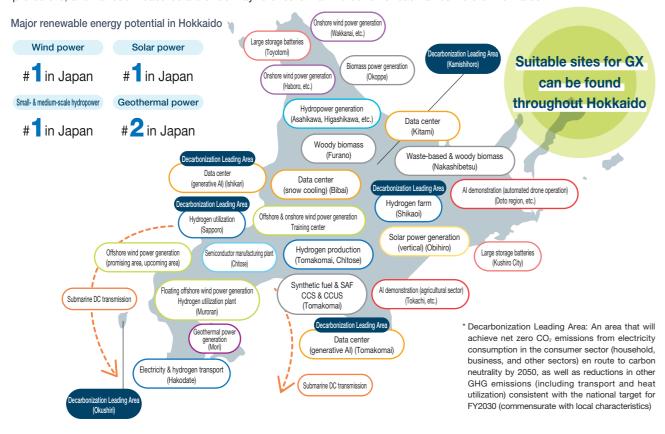

\* This project aims to establish a local hydrogen supply by FY2027 by simultaneously examining onboard hydrogen production and transport derived from marine and offshore energy distinct to the Tsugaru Strait (aiming to utilize solar, wind, waves, tides, and all other sources) and, on the demand side, conversion and utilization of hydrogen energy in Hakodate.

#### **Special Feature 1**

# Promoting GX in Hokkaido

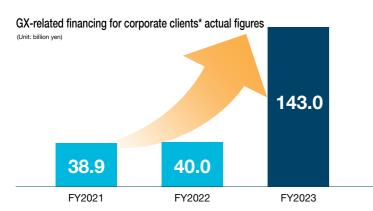

#### **Greatest Renewable Energy Potential in Japan, and Illustration of GX Projects in Hokkaido**

Hokkaido is home to roughly 40% of Japan's renewable energy reserves. Creating new energy through GX represents a great opportunity for the growth and advancement of the Hokkaido economy. Suitable sites for GX can be found throughout the prefecture, and various measures are underway to ensure that the benefits reach all corners of Hokkaido.

#### **Promoting GX-Related Financing**

We proactively engage in GX-related financing to ensure that GX-related spillover reaches all corners of Hokkaido.

<sup>\*</sup> Scope: Financing to fund solutions to environmental issues, SDGs (Eco/Biodiversity) Private Placement Bonds, sustainable loans (environment-related), Renewable Energy Project Finance

GX-related developments in Hokkaido

#### Industry-Academia-Government-Finance Collaboration to Promote Hokkaido GX

#### Establishment of "Team Sapporo-Hokkaido" and the Bank's Role

On June 23, 2023, GX Financial Consortium "Team Sapporo-Hokkaido" was established. The team comprises 21 organizations in industry, academia, government, and finance, and was formed to realize a financial center for Asia and the rest of the world, a cluster of GX-related funds, human resources, and information in Sapporo and Hokkaido to maximize the renewable energy potential of Hokkaido (the best in Japan).

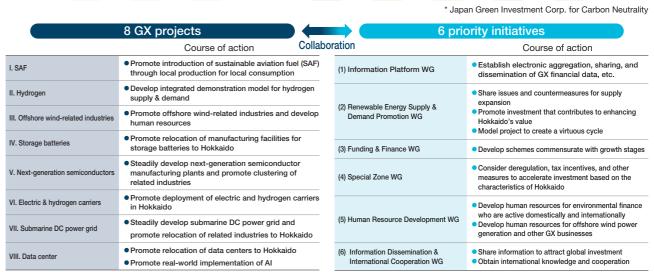

Team Sapporo-Hokkaido aims to attract public and private GX investment—estimated to exceed 150 trillion yen over the next decade—plus an additional 30 to 40 trillion yen from around the world to Sapporo and Hokkaido through collaboration on eight GX projects and six priority initiatives.

In addition to serving as the joint secretariat along with the Sapporo municipal government, the Hokkaido prefectural government, and Hokuhoku Financial Group, Inc., the Bank oversaw the Special Zone Working Group, which was seeking approval as a National Strategic Special Zone, and worked with the applicants—the Sapporo municipal government and the Hokkaido prefectural government—to prepare draft proposals for deregulation, tax incentives, and other measures to promote environmental investment.

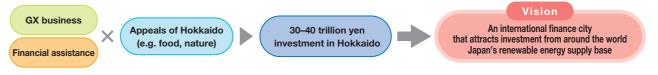

Photo of the foundation symposium

#### **Obtaining Certification as a National Strategic Special Zone**

Special zones are a regulatory reform system in which the national government designates certain regions and sectors to benefit from deregulation, tax incentives, and other measures aimed at realizing growth strategies. Previously, Hokkaido had no special zones. We made efforts to realize a GX Finance and Asset Management Special Zone to provide financial support for GX, which leverages the renewable energy potential of Hokkaido and Sapporo (the best in Japan), and achieved the special zone designation on June 26, 2024.

#### **Participating in an Offshore Wind Consortium**

To promote the offshore wind power generation business, which has a particularly broad supply chain, we formed a consortium with the Hokkaido Economic Federation, ANIC\*, the Hokkaido Research Institute for the Twenty-first Century, Dogin Regional Research Institute, Hokuhoku Financial Group, and others to conduct studies and research on establishing an offshore wind power supply chain and providing support for securing human resources, as well as to provide support for matching individuals.

<sup>\*</sup> Agency for New Industry Cluster of Hokkaido

### **Special Feature 2**

# **Next-Generation Semiconductor Project**

#### Rapidus' Expansion into Hokkaido

©Rapidus Corporation ©KAJIMA CORPORATION

In February 2023, Rapidus decided to build a new state-of-the-art semiconductor plant in Chitose, Hokkaido. The plan is to jointly promote further development of IBM's groundbreaking 2-nm (two billionths of a meter) chip technology and introduce it to the Chitose manufacturing facility.

Construction of the plant began in September 2023, with the goal of launching prototype lines in 2025 and mass production lines in the late 2020s.

#### **Economic Spillover in Hokkaido**

In November 2023, the Agency for New Industry Cluster of Hokkaido released a simulation estimating that the cumulative economic spillover in Hokkaido could reach as much as 18.8 trillion yen.

		Scenario 1	Scenario 2
	Rapidus plant	only Plant 1 constructed	
Ass	Start of mass production	Plant 1: FY2027	Plant 1: FY2027 Plant 2: FY2030
Assumptions	Industrial clustering (percentage of Rapidus procurement & sales)	Procurement in Hokkaido: 15% Sales in Hokkaido: 0%	Procurement in Hokkaido: 30% Sales in Hokkaido: 5%
ons	Number of relocations to Hokkaido (establishments in related industries)	20	70

#### **Increase in Land Prices in Chitose**

Since Rapidus' decision to expand into the Chitose area, demand for land for rental condominiums, hotels, and businesses has increased, and land prices have risen in both residential and commercial areas. The rate of increase in Chitose is high compared to the national average.

	■ National land price increase rankings (As of January 1, 2024)							
	National ranking	Increase (%)	Prefecture	Address				
	1	27.9	Hokkaido	4777-33, Kitanomine-cho, Furano

## The Bank's Support for Companies Expanding into Hokkaido

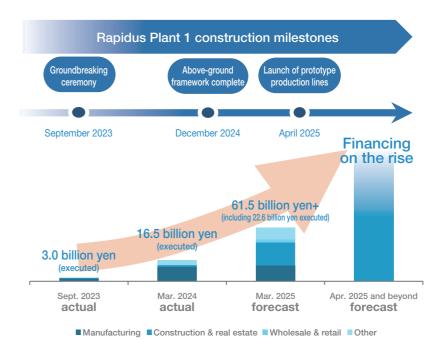

Since Rapidus' decision to expand into Hokkaido, several related companies and research institutions have announced their intent to follow suit. We support this expansion in collaboration with government agencies, private organizations, and other financial institutions.

#### **Examples of Support for Expansion into Hokkaido**

Company name	Head office location	Main line of business	Solutions offered	
Kimura Kanko Co., Ltd.	Fukushima	Pipe laying, welding machinery and equipment installation, etc.	We plan to provide support in collaboration with The Toho Bank, a TSUBASA Alliance bank in Fukushima. Group company Hokkaido Kyoso Partners will provide recruiting assistance.	
Japan Material Co., Ltd.	Mie	Development, manufacture, and sales of specialty gas supply equipment, design and installation of supply piping	Hokkaido Kyoso Partners will provide recruiting assistance. Ja Material Co., Ltd. exhibited at North Pacific Bank Manufactu Sustainability Fair 2024 (an exhibition-type business fair sponso by the Bank).	
Technowell Inc.	Yamaguchi	Semiconductor, pharmaceutical, and hydrogen energy-related businesses; design, manufacturing, and installation of piping units	Introduced to us by The Iyo Bank, a TSUBASA Alliance bank in Ehime. Hokkaido Kyoso Partners will provide recruiting assistance. Technowell Inc. exhibited at North Pacific Bank Manufacturing Sustainability Fair 2024.	
Technoflex Corporation	Tokyo	Pipe manufacturing, etc.	Hokkaido Kyoso Partners will provide assistance with recruiting and applying for subsidies from the Group.	
Naigai TEC Corporation	Naigai TEC Corporation Tokyo		We provide data on commercial real estate. Hokkaido Kyoso Partners will provide recruiting assistance. Naigai TEC Corporation exhibited at North Pacific Bank Manufacturing Sustainability Fair 2024.	

#### Semiconductor-Related Financing (Cumulative)

Our semiconductor-related financing is increasing at an accelerated pace as the Rapidus project progresses. We will continue to provide a variety of solutions while staying current on the needs of companies in and outside of Hokkaido.

#### Daisuke Shinohara

Assistant Manager (stationed at Tokyo Branch), Growth Strategy Planning Office, Management Planning Department

We see Rapidus' decision to locate its plant in Chitose as an excellent opportunity to substantially change the industrial structure of Hokkaido

To ensure that the semiconductor industry will form a lasting cluster in Hokkaido, we must support the further expansion of the industry.

We will continue to collect updated information, support semiconductor-related companies expanding into Hokkaido, and promote efforts to match them with local companies.

<sup>\*</sup> These estimates were not calculated or published by Rapidus; they are based on assumed conditions and figures. Simulation results vary depending on assumptions and estimates.

# ■ Individual Strategy

Offering products and services that meet the needs and life stages of our customers, centered on in-person consulting predicated on customer-oriented sales.

## Takayuki Kawamura

Executive Officer and General Manager of Retail Business Headquarters

#### My beginnings

I have worked at sales branches and in personal loan planning for many years. When I first joined North Pacific Bank and became a personal loan officer, I had the opportunity to talk with many customers with different life experiences and suggest the Bank's loan products that would best suit their needs. In hindsight, it was a great source of growth for me, and may have been the starting point of my career in consulting.

Digitalization is advancing so rapidly that now we can do many things on just a smartphone. As a regional bank, our mission is to help resolve issues by meeting directly with our customers while continuing to pursue greater convenience for already expedient services.

#### Aiming for gratitude

At North Pacific Bank, we are strengthening our life planning support services to help customers resolve various concerns and worries in this age of 100-year lifespans. Life planning support is a comprehensive service provided with the long-term aim of helping customers realize their dreams and goals, and addresses a variety of money-related needs, including education funding, home purchases, cashless transactions, asset management, and preparing for life after retirement.

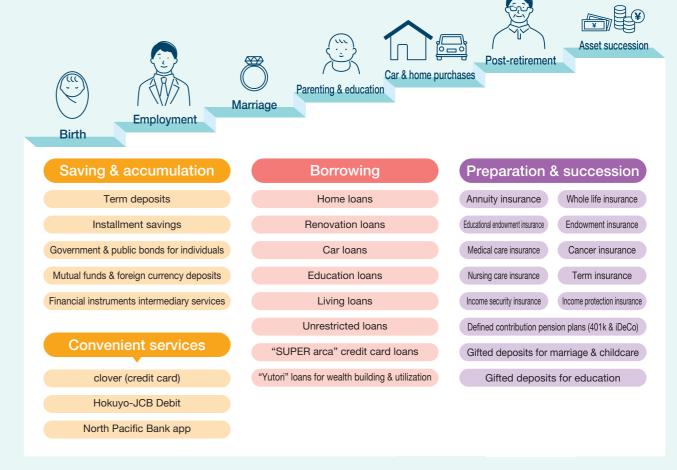

Our goal is to offer the optimal plan to each and every customer to help them lead a fulfilling life. Our expert staff members listen carefully to customer's circumstances and future aspirations, and use that information to offer the best advice and targeted plans.

We also offer consultations and seminars on public holidays, online life planning consultations, and more. We encourage customers who have difficulty coming to the bank on weekdays to take advantage of these services.

We will expend every effort to provide customer-oriented services so that our highly valued current and potential customers are glad that they chose North Pacific Bank, and do our utmost in pursuit of their gratitude.

#### **Life Planning Support**

We propose appropriate services tailored to our customers' life cycles and stages, and provide support for them to lead fulfilling lives with a sense of security by addressing their concerns and worries about their wealth as they age in this era of 100-year lifespans.

#### Strengthening Consulting for Support

# Improving customer convenience with digital technology

- Portal app for improved automated services
- Using digital technology to streamline reception and create more time for engaging with customers
- Strengthening collaboration with the Group and partners to meet needs for cashless transactions

## Proposing life plans for wealth-building

- New Life Consulting Plaza is a one-stop shop for consultations on loans and life planning
- ➡ Providing support for comprehensive life planning including loans, savings, insurance, succession, and more through empathetic consulting for customers who are currently borrowing from the Bank

# Intimate support for sustainable living in the age of 100-year lifespans

- Doubling Asset-based Income Plan: Proposing long-term, diversified, and accumulated savings with NISA & iDeCo accounts
- ➡ Proposals for wealth-building for clients' employees and their families
- ➡ Intimate support for resolving concerns associated with prolonged retirement

## Group-wide consulting to resolve customers' issues

- Rigorously fulfilling the roles of banks and securities firms, improving problem-solving capabilities through human resource development
- Strengthening the specialized human resources of North Pacific Securities and other Group companies to achieve more sophisticated, diverse problem-solving functions
- Providing intimate consulting for long-lasting business relationships

# **Diversity & Inclusion**

North Pacific Bank believes that increasing corporate value over the medium and long term requires encouraging active participation by women as well as mid-career hires and foreign nationals with diverse knowledge and experience. Accordingly, we are strengthening mid-career recruitment in collaboration with Hokkaido Kyoso Partners, a Group subsidiary engaged in the staffing business.

#### **Initiatives to Support Balancing Childcare and Work**

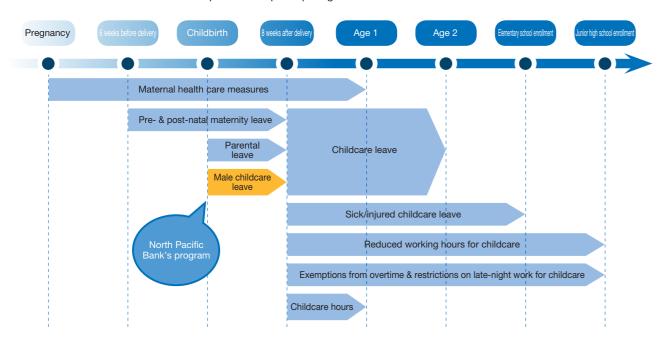

We are making efforts to accommodate a variety of work styles that allow all Bank employees to exhibit their skills to the fullest, and create an organization where each of them feels fulfilled at work.

Established within the Personnel Department, the Diversity Promotion Office provides female employees, who account for 40% of our total staff, with individual consultation on career advancement and life planning, as well as training aimed at supporting women in career formation.

#### Work-Life Balance Support System

In addition to legally mandated childcare leave, we have established our own childcare leave program that supports employees in childcare by enabling them to take 10 days of leave in the first eight weeks after their spouse gives birth.

We also use an internal social networking service to introduce employees who have taken childcare leave and their supervisors in an effort to raise awareness of the importance of participating in childcare.

#### Comments from a Male Employee who has Taken Childcare Leave

#### Yoshio Segawa Section Manager, Head Office

I took 375 days of childcare leave for the birth of my third child. As a man, I did not think it was right for me to take a year off, and as an employee, it pained me to think of leaving the small group I work with for such an extended period of time. But my supervisor suggested that I take as long as I thought I would need, and that is how I ended up taking a lengthy childcare leave.

Some of my colleagues said they appreciated the precedent I was setting, and I was quite happy to hear that. After discussing with my wife how to spend the childcare leave period, I mainly did housework and took care of the older children, who were quite active (and mobile) at that stage and needed more attention than the baby. I am grateful that I got to experience the growth of all three of my children first-hand.

#### **Active Participation by Female Employees**

We provide various forms of support for employees with respect to childcare leave to help them continue their employment through childbirth and childcare, including support for employees returning to the workplace.

Career development training for women at all levels, support for employees on childcare leave to return to work, and other programs provide support for women to continue working after giving birth and while raising children. Additionally, training for female branch managers and assistant branch managers includes a six-month mentoring program with senior female branch managers to provide emotional support. As a result of this support for more active participation by women, the percentage of women in management positions has increased each fiscal year. The difference in average years of employment between male and female employees decreased from 4.3 years in FY2017 to 2.2 years in FY2023.

#### Preparing Female Employees for Management Positions

In FY2023, we established a new training program for female employees who will work in management positions in the future. We also introduced a mentoring program for training participants to improve their career development and management skills through dialogue with management.

Photo of a training session for developing female managers

## First Company in Hokkaido to Obtain Platinum Eruboshi Certification

In June 2024, we became the first company in Hokkaido to receive Platinum Eruboshi Certification based on the Act on the Promotion of Women's Active Engagement in Professional Life.

#### **Diversifying Human Resources**

#### **Employing Foreign Nationals**

We have a total of seven foreign employees (five overseas and two at our head office) working at three overseas locations and at our head office, and one of them has been promoted to a management position (overseas location). We hired one foreign national in FY2024.

(Left: Ms. Tia Shae Igarashi, Right: Ms. Rong Jie)

#### Initiatives to Hire People with Disabilities

To realize a society in which people with disabilities can live in the community with a sense of security, and to support their social independence, we are making efforts to create workplaces where people with disabilities can leverage their individuality and strengths.

#### Creating Environments Conducive to Participation by Post-retirement Employees

Under our Post-retirement Employee Rehiring Program, all applicants who wish to do so may continue working until age 65. In our rehiring, we offer assignments that make the most of past careers and experience. More than 300 employees are currently using the program, and more than 100 of these have chosen to work at our sales branches. We have also introduced a Post-retirement Partner Program that allows employment to be extended up to a maximum age of 70.

#### Q: Why did you choose North Pacific Bank?

#### Interview with Foreign Employees

Tia Shae Igarashi (Tia): I came to Japan from Australia to attend a university in Hokkaido. I was attracted to Hokkaido's unique natural environment and food culture, and the friendly community suited me very well. In my job search, I knew I wanted to give back to Hokkaido, so I decided to join North Pacific Bank because it is deeply rooted in local communities and can contribute to Hokkaido's economy and communities.

Rong Jie (Rong): During my study abroad in Hokkaido, I met many kind people and received support from those around me in many ways. I cherished my connection to Hokkaido and wanted to return the favor, so I looked for a job in Hokkaido. What interested me about working for North Pacific Bank was its robust support for the stability and growth of the Hokkaido economy through proactive development of a broad range of international operations, and I also felt an immediate affinity for the Bank when I learned that they have an office in Shanghai, my hometown.

#### Q: Did you face any difficulties at first?

Tia: The language, but also the business culture, etiquette, and how to talk on the telephone. But I received the same guidance as my peers, and thanks to that, I am now confident in my ability to handle my work.

Rong: When I first joined the Bank, I was assigned to the International Department, so I studied the relevant foreign exchange laws, regulations, and administrative standards. It was difficult to memorize the challenging legal text and find ways to apply it in my daily work. I also remember how nervous I was when I had to answer the phone—something I was not used to—and at the same time explain legal provisions I had just learned to the branches.

#### Q: What are your future goals?

Tia: I want to educate myself and obtain certifications while developing more cooperative relationships with my colleagues. My goal here is to improve my leadership skills in the future and advance my career while learning new things. I want to be a bank employee who can use her knowledge and experience as a foreign national in Japan to help solve Hokkaido's problems.

Rong: My current goal is to become a trustworthy bank employee by working on a wide range of tasks and gaining a variety of experiences.

In the future, I want to fully utilize my knowledge and experience to serve as a bridge between Hokkaido and the rest of the world, and rise to the challenge of creating new value for our customers and the Bank.

## **Corporate Governance**

#### **Corporate Governance Basic Policy and Structure**

#### **Basic Approach**

Inspired by the Management Philosophy of the North Pacific Bank Group, we at North Pacific Bank pursue sustainable growth and improved corporate value in the medium and long term. Our basic approach to achieving those goals is to earn and retain the trust of our shareholders, clients, workforce, local communities, and other stakeholders, and to pursue effective corporate governance.

#### System Overview

#### Spotlight

**External Directors** 

June 2024: Transition to a company with an Audit and Supervisory Committee

The Bank transitioned to a company with an Audit and Supervisory Committee following a resolution to amend its Articles of Incorporation at the Annual General Meeting of Shareholders held in June 2024. In conjunction with this transition, the Bank will further strengthen its corporate governance by establishing an Audit and Supervisory Committee comprising four directors who are Audit and Supervisory Committee members, and will work to achieve sustainable growth and enhance the Bank's corporate value over the medium and long term.

The Bank has appointed one external director (who is not an Audit and Supervisory Committee member) in an effort to enhance management transparency. The primary role of external directors (who are not Audit and Supervisory Committee members) is to use their advanced knowledge and extensive experience in corporate management and specialized fields to contribute to constructive discussions and management supervision at meetings of the Board of Directors from a standpoint independent of management.

Additionally, to enhance the effectiveness of audits, the Bank has appointed three external directors who are Audit and Supervisory Committee members. The primary role of external directors who are Audit and Supervisory Committee members is to use their advanced knowledge and extensive experience in corporate management and specialized fields to conduct highly effective audits from an objective perspective, thereby contributing to ensuring sound management.

#### Internal Control System Maintenance

#### **Basic Internal Control Policy**

In accordance with the Companies Act and the Ordinance for Enforcement of the Companies Act, the Board of Directors has approved a Basic Internal Control Policy and established a system to ensure the appropriateness of the Bank's operations and those of the corporate group comprising the Bank and its subsidiaries. Additionally, the Regulations on Administrative Authority and other regulations clarify duties, authority, and decision-making rules, while Group Management Regulations, Subsidiary Management Guidelines, and other regulations clearly define the management decision-making and reporting structures within the Group and establish a system to ensure the efficient execution of duties by the directors of the Bank and its subsidiaries.

#### Objective 1: Strengthen audit and supervisory functions

We have granted voting rights at Board of Directors meetings to directors who are Audit and Supervisory Committee members in an effort to strengthen audit and supervisory functions.

#### Objective 2: Expedite decision-making

We have delegated some of the Board of Directors' important business execution decisions to the directors in an effort to establish a system that allows for further expedited management decision-making and business execution under proper supervision of the Board of Directors.

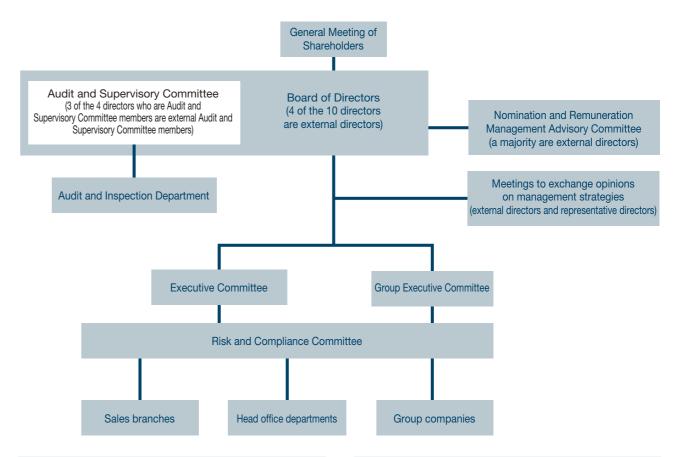

#### **Internal Audits and Accounting Audits**

The Bank has established an Internal Audit and Inspection Department positioned independently of the departments subject to audit to conduct internal audits of the head office, sales branches, and subsidiaries based on audit policies and plans determined by the Audit and Supervisory Committee. Audit results are regularly reported to the Audit and Supervisory Committee and the Board of Directors. North Pacific Bank has appointed KPMG AZSA LLC as its accounting auditor. To ensure the effectiveness of audits, the accounting auditor and Audit and Supervisory Committee members meet regularly to exchange information and opinions. Additionally, Audit and Supervisory Committee members confirm the status of the Bank's internal controls by attending meetings of the Disclosure Committee, Risk and Compliance Committee, and other important committees.

#### **Basic Policy for Internal Control over Financial Reporting**

We believe that ensuring the reliability of securities reports and other financial reporting is a vital aspect of the Bank's management, and in response to the Internal Control Reporting Regime based on the Financial Instruments and Exchange Act, the Bank has decided on Basic Policy for Internal Control over Financial Reporting, and established Internal Controls on the Group's Financial Reporting.

#### **Corporate Governance System Chart**

#### Board of Directors (14 meetings in FY2023)

The Board of Directors comprises 10 directors, six of whom are directors who are not Audit and Supervisory Committee members (one of whom is an external director), and four of whom are directors who are Audit and Supervisory Committee members (three of whom are external directors). The primary responsibilities of the Board of Directors are to make important decisions (including management strategies and plans), and to effectively supervise corporate management and the directors.

#### Nomination and Remuneration Management Advisory Committee (5 meetings in FY2023)

The Nomination and Remuneration Management Advisory Committee comprises two representative directors and four external directors, and determines amounts of remuneration for individual directors (who are not Audit and Supervisory Committee members) and discusses and reports to the Board of Directors on matters such as the appointment of directors.

#### Executive Committee (17 meetings in FY2023)

The Executive Committee, which comprises internal directors, makes resolutions on important matters not on the agenda of the Board of Directors, and discusses matters on the agenda and matters required by the chairman in an effort to stimulate discussion for swift decision-making.

#### Audit and Supervisory Committee (16 meetings in FY2023 (as the Audit & Supervisory Board))

The Audit and Supervisory Committee comprises one internal director and three external directors. As an independent body, the committee's primary responsibility is to conduct highly effective audits of directors' execution of duties. The committee prepares audit reports, receives reports on directors' execution of duties, and submits statements of its opinions to directors or the Board of Directors as necessary.

# Message from the CRO

## **Building robust management** infrastructure to underpin sustainable growth

#### Akira Yamada

Managing Director and CRO

#### Increasingly complex circumstances

We see that the environment surrounding financial institutions is changing rapidly. The risk environment is becoming more diverse and complex due to accelerating population decline caused by a declining birthrate and population aging, a decrease in the number of business establishments due to lack of successors, response to environmental issues such as reducing CO2 emissions (SX), rapid progress in digitization (DX), mounting cybersecurity threats associated with the spread of IT systems and cloud services, and more. Under these circumstances, the North Pacific Bank Group believes that it is increasingly necessary to accurately and comprehensively interpret various risks, maintain financial soundness so that we can use our own capital to absorb losses when risks materialize, and upgrade our risk management framework.

#### Compliance is at the core of everything we do

The first item in the Group's Code of Conduct is "Acting with integrity and a firm awareness of compliance and our social responsibilities," placing compliance at the core of everything we do. Accordingly, the Board of Directors oversees the compliance framework of the Bank and the Group based on the Basic Internal Control Policy, and the Risk and Compliance Committee formulates specific action plans and the like to ensure compliance as a key

Each and every member of the Group is aware that the trust of our stakeholders is in the balance for every one of their actions, and measures to foster a sound corporate culture are reflected in the Compliance Program for each fiscal year. For the Compliance Program for FY2024, the basic policy is to improve our ability to resolve compliance issues autonomously. Under the program, we are working to create an organization in which each and every employee is capable of identifying and addressing compliance-related problems on their own based on our Management Philosophy, Code of Conduct, and high ethical standards.

#### Risk Management at the Bank

The Group exhaustively identifies various types of increasingly diversified and complex risks, and manages them by risk category, such as credit risk and market risk. We also conduct risk management by taking a holistic view of the risks assessed in each category and comparing and contrasting the level of risk against our management vitality (integrated risk management). Specifically, we allocate capital to each target category (credit risk, market risk, and operational risk) in advance within the limits of capital adequacy, and then quantify and monitor the level of each risk to ensure that it is within the limits of the allocated capital. When allocating capital, we set aside a buffer for unmeasured risks, new business, and other unexpected developments, and also conduct stress tests to assess and verify capital adequacy in an effort to ascertain the impact of risk events we have not identified.

#### Credit Risk Management

Credit risk refers to the risk of a decline in asset value or loss of assets by the Group due to a deterioration in an obligor's financial position or its ability to pay, and the risks that arise if large-lot loans are tilted toward or concentrated on specific industries or corporate groups. There are two ways to deal with credit risk. The first is to manage individual loan transactions using appropriate methods in accordance with credit status. The second is to manage loan portfolios to avoid excessive exposure to specific borrowers and industries, thereby dispersing credit risk. The Bank's divisions in charge of credit screening are divided into departments according to the size, industry, and credit status of individual borrowers. They are prepared to provide appropriate advice, managing each client individually to ensure that we properly ascertain credit risk. Additionally, the Risk and Compliance Committee and the Credit Risk Management Review Committee monitor and verify the Group's overall credit risk by appropriately managing the Group's overall credit portfolio.

#### Market Risk Management

Market risk relates to the risk of loss from value declines in asset holdings caused by changes in interest rates, prices of securities, and foreign exchange rates, among other factors. As the Bank of Japan continues to normalize its monetary policy, it has become extremely important for the management of financial institutions to anticipate market risk and avoid or mitigate it accordingly. Our Securities Investment and Risk-Taking Policy contains basic policies for low-risk investment, medium- to long-term diversified investment, emphasis on market liquidity, and the like, and we carry out securities investment with the aim of adjusting ALM and managing surplus funds. Additionally, we do not rely excessively on market outlooks, nor do we take investment actions aimed at securing short-term profits. The Risk and Compliance Committee and ALM Committee monitor, check, and manage the level of market risk in the Group's overall assets under management.

#### Liquidity Risk Management

Liquidity risks involve two kinds of risk. One is cash flow risks, which refers to difficulties in securing the necessary amount of funds or losses incurred in having to raise funds at interest rates significantly higher than normal as a result of unexpected cash outflows. The other is market liquidity risks, which refers to the inability to trade on markets or having to trade at prices considerably less favorable than normal as a result of market confusion and other factors. To appropriately manage this type of risk, we have established Liquidity Risk Management Regulations containing policies and basic matters concerning liquidity risk management. Cash flow managers keep close tabs on daily and monthly cash flow trends and work to control cash flow risks, while liquidity risk managers monitor closely to check for cash flow or market liquidity risks. Any significant changes in the market environment or the Bank's cash flow are immediately reported to management, and the Risk and Compliance Committee and other committees promptly make decisions on necessary measures and other matters.

#### Operational Risk Management

Operational risk refers to the risk that an operational process, or an act by a corporate officer or employee, or a system, is inappropriate, or the risk of loss due to external circumstances. The Group has established Operational Risk Management Regulations and manages operational risk by dividing it into administrative risk, system risk, legal risk, tangible asset risk, and human risk based on its characteristics. To manage operational risk, we collect and analyze data on materialized losses and formulate measures to prevent recurrence in addition to identifying and evaluating potential risks that have not yet materialized through risk control self-assessments (RCSA) of various operations, and formulating countermeasures accordingly. Notably, in addition to ensuring redundancy of computer equipment and communication lines and reinforcing backup systems in preparation for system risks, we have also taken steps to enhance our cybersecurity management system, for example by establishing Hokuyo CSIRT to collect and analyze data on cyberattack trends and vulnerabilities and take prompt action in light of the increasing severity of cybersecurity threats.

#### For sustainable growth

Under the Medium-term Business Plan (Theme: Taking on the Challenge of New Growth: Growing sustainably together with our customers and local communities), we aim to achieve sustainable growth in Hokkaido together with our customers and local communities by striking a full balance between contributing to the environment and society on one hand, and improving economic value on the other.

To realize this goal, we will build robust management infrastructure through proactive efforts to properly practice compliance and risk management, the bedrock of our business.

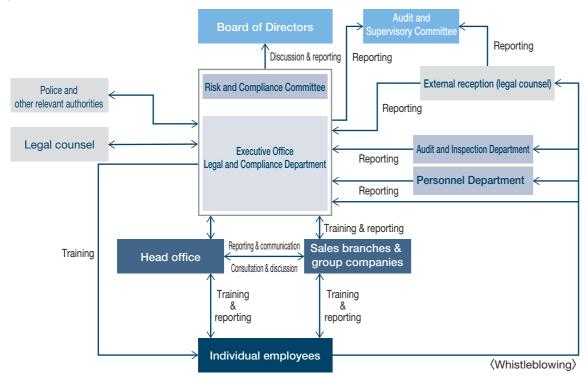

# Compliance

We expend every effort to let all employees know that compliance is at the core of everything we do, consistent with one of the items in the North Pacific Bank Group's Code of Conduct: "Acting with integrity and a firm awareness of compliance and our social responsibilities."

#### **Compliance Management Framework**

Based on the Legal Compliance Rules of North Pacific Bank, the Board of Directors oversees the development of the compliance framework for the Bank and its group companies, and the Risk and Compliance Committee formulates specific action plans and other relevant matters.

#### Personal Information Protection and Customer Protection

#### **Personal Information Protection**

We have published a Personal Information Protection Declaration (Privacy Policy) in accordance with the Act on the Protection of Personal Information, and have established safety management measures for personal information protection, including frameworks for preventing leakage of information and receiving requests for disclosures and the like.

#### **Customer Protection**

Based on the Act on the Provision of Financial Services, the Bank has established Customer Protection Management Policies to enhance customer convenience and protection and Solicitation Policies to provide customers with appropriate financial products, and strives to reinforce customer confidence through fair business operations.

#### **Conflict of Interest Management**

The Bank has also established Conflict of Interest Management Policies and Rules for the Prevention of Conflicts of Interest to protect customers' interests by keeping tight control of transactions that may constitute a conflict of interest.

#### **Dealing with Antisocial Forces**

The Group takes a firm stance against antisocial forces that threaten the order and safety of civil society, and will remain steadfast without compromise in an effort to realize a safe society that is comfortable for everyone. Accordingly, we have established a Basic Policy for Dealing with Antisocial Forces and are working to eradicate transactions with antisocial forces. We will continue to develop our systems and strengthen our responses to eliminate transactions with antisocial

#### Measures against Money Laundering and Terrorist Financing

Measures against money laundering, terrorism financing, proliferation financing, and other violations of economic sanctions (hereinafter collectively referred to as "money laundering and terrorism financing") are an increasingly important issue shared in the international community. We at North Pacific Bank consider these measures to be one of our key management issues, and, in addition to implementing obvious measures such as confirmation at the time of transaction defined in the Act on Prevention of Transfer of Criminal Proceeds, the Foreign Exchange and Foreign Trade Act, and other relevant laws and regulations, we have a range of effective measures in place in light of "Guidelines for Anti-Money Laundering and Combating the Financing of Terrorism" and "Guidelines for Operators Handling Foreign Exchange Transactions on Observing Laws and Regulations on Foreign Exchange '

In addition to performing legally required checks when transactions take place, we established our own Basic Policy on Countering Money Laundering and the Financing of Terrorism, and launched a dedicated Financial Crime Prevention Office within the Legal and Compliance Department to oversee its implementation. We will continue to take steps to enhance our framework for preventing money laundering and terrorism financing based on our risk-based approach and work with fellow TSUBASA Alliance members to implement and further advance measures against money laundering and terrorism financing.

#### Internal Whistleblower System

To create open, comfortable workplaces, we have introduced an internal whistleblower system that includes an internal reporting desk and external reception by legal counsel to detect and correct violations of laws, regulations, and internal rules, harassment, and other misconduct as soon as possible. In addition to interviews and telephone calls, we respond with consideration for whistleblowers by providing means of reporting that ensure anonymity.

In the event that an officer or employee of the Bank or a subsidiary discovers a questionable legal action, they may report it directly to the Bank's head office, or to an external reception organization through legal counsel in an effort to promptly identify and correct any inappropriate actions or compliance-related problems. In addition, the Internal Whistleblower Regulations, which all officers and employees within the Group must abide by, provide a system in which the Legal and Compliance Department receives reports through notification structures and reports them to Audit and Supervisory Committee members on a case-by-case basis, and a system in which notification structures can report directly to Audit and Supervisory Committee members. These systems are designed to create a proper framework for thoroughly protecting whistleblowers and to avoid putting them at a disadvantage.

#### **Efforts to Ensure Compliance**

In recognition of the fact that the Bank's brand and the trust of our stakeholders are in the balance for every action by each and every member of the Group, we have established the Compliance Program to enhance trust in the Bank and will continue to work to identify warning signs and problems and strengthen our early response framework.

Issues for the Bank

- Improve skills for interpreting warning signs
- Strengthen management skills and resolve communication deficiencies in management and leadership positions

3 key measures for FY2024

- Identify warning signs of misconduct (risks)
- Strengthen head office collaboration for the soonest possible resolution of problems
- · Raise awareness of the need to create an autonomous framework for front-line situations before problems emerge

#### Respecting Human Rights

In June 2023, as part of our sustainability initiatives, we established the North Pacific Bank Group Human Rights Policy to contribute to the sustainable development of all stakeholders, the regional community, and the environment which support us, while also striving to achieve improved corporate value and sustainable business management for the Group over the medium and

As it becomes increasingly important for corporations to fulfill their responsibility to respect human rights, they must establish human rights policies and take action and respond in accordance with corporate ethics. The Group has established a framework for properly responding to requests for consultation, suggestions, and complaints from customers and other stakeholders regarding human rights and other matters.

If it comes to light that the Group is causing or contributing to negative impacts on human rights, or that its products or services are directly involved in negative impacts on human rights, the Group will take appropriate action to remedy the situation.

The Group accepts requests for consultation, suggestions, and complaints from individuals regarding human rights via telephone and its website. We are also working to build a framework for human rights, including a consultation service for bank employees.
